# Subject Index

Accumulation
Agarose, Algae, Aglinate, *Chlorella*, Immobilization, Mercury, Packed-bed reactor, Phosphate, Volatilization, 802
Acetic acid
*C. thermoaceticum*, Membrane bioreactor, 104
*Acetobacter pasteurianus*
Racemic glycidol, Oxidation, Enantioselectivity, 1059
Actinomycete xylanases
Synergism, Xylan solubility, 696
Activity
Lipase, Monoacylglycerols, Triolein, Dioleylglycerol, Monooleylglycerol, Glycerolysis, Stability, Immobilization, 864
Activity stabilization
Water-soluble polymers, Penicillin acylase, 616
Acyl-transfer
Microaqueous enzymology, Lipase, Esterification, Organic solvents, Solvent suitability, Substrate polarity, 577
Acyl transfer reaction
Ethyl-chymotrypsin, Enzymatic peptide synthesis in organic solvent with low water content, 596
Adsorption
Alcoholysis, Interesterification, Lipase, Operational stability, Silica gel, 478
Cellulose, Cellulase, Synergism, Thermodynamics, 649
Granular starch, Starch-binding domain, β-*galactosidase*, Fusion protein, Elution, 18
*Rhizopus arrhizus*, Metal ions, Isotherms, Hard and soft metals, 671
Agarose
Accumulation, Algae, Aglinate, *Chlorella*, Immobilization, Mercury, Packed-bed reactor, Phosphate, Volatilization, 802
Airlift reactor
Exopolysaccharide, β1–3-D-Glucan, *Pleurotus florida*, Stirred-tank reactor, 566
*Alcaligenes eutrophus*
Poly(3-hydroxybutyric-co-3-hydroxyvaleric acid), P(3HB-co-3HV), High cell density culture, Fed-batch culture, On-line glucose analyzer, Substrate concentration control, 556
Alcohol dehydrogenase
*Debaryomyces hansenii*, Xylitol, Xylose reductase, Xylitol dehydrogenase, Glucose-6-phosphate dehydrogenase, 6-phophogluconate dehydrogenase, Oxygen transfer rate, 1074
Alcohol oxidase
*Pichia pastoris*, Catalase, Hydrogen peroxide, Production, Treated cells, 10
Alcoholysis
Interesterification, Lipase, Operational stability, Silica gel, Adsorption, 478
Lipase, Organic solvents, Hydrolysis, 2-monoglycerides, Water activity, Operational stability, 1042
*Pseudomonas fluorescens* lipase, Hydrolysis, Emulsion system, Lipase adsorption, Particle size analysis, Interfacial area, Product inhibition, Interfacial properties, 513
Algae
Accumulation, Agarose, Aglinate, *Chlorella*, Immobilization, Mercury, Packed-bed reactor, Phosphate, Volatilization, 802
Alginate
Accumulation, Agarose, Algae, *Chlorella*, Immobilization, Mercury, Packed-bed reactor, Phosphate, Volatilization, 802
Bioproduction, Dextran, Exopolysaccharides, Immobilized cells, Pullulan, Xanthan, 1048
Alginate gel stability
11α-Hydroxylation, Progesterone, Alginate-immobilized cells, Gelling agent, Phosphate damage, 551
Alginate-immobilized cells
11α-Hydroxylation, Progesterone, Gelling agent, Alignate gel stability, Phosphate damage, 551
Steroid transformation, Progesterone, 11α-hydroxylation, Organic solvent, Two-phase system, Polyurea membrane, 485
Alicyclic
*Pseudomonas oleovorans*, Alkane hydroxylase, Substrate specificity, Branched alkanes, Aliphatic, 904
Aliphatic
*Pseudomonas oleovorans*, Alkane hydroxylase, Substrate specificity, Branched alkanes, Alicyclic, 904
Alkaline phosphatase
*Streptavidin*, Biotin, Cellulose-binding domain, Fusion protein, β-glucosidase, Enzyme immobilization, 496
Alkaline protease
*Bacillus subtilis*, Plasmid stability, 534
Alkaline proteinase
Dextran, Dialdehyde dextran, Chemical modification, Detergent, *Bacillus*, 99
Alkane hydroxylase
*Pseudomonas oleovorans*, Substrate specificity, Branched alkanes, Alkylbenzenes, Aliphatic, Alicyclic, 904
Alkylbenzenes
*Pseudomonas oleovorans*, Alkane hydroxylase, Substrate specificity, Branched alkanes, Aliphatic, Alicyclic, 904
Alkyl glycoside
β-Glucosidase, Water activity, Organic media, 751
Alkyl glycoside fatty acid esters
Alkyl glycoside, Enzymatic synthesis, Lipases, Organic solvent, Transesterification, 115
Alkyl glycosides
Alkyl glycoside fatty acid esters, Enzymatic synthesis, Lipases, Organic solvent, Transesterification, 115
α-Amylase
Aqueous two-phase systems, Partition, pH, PEG molecular weight, Effect of NaCl, Phase volume ratio, *Bacillus subtilis*, Purification factor, Recovery, 131
Thermostable, Purification, Characterization, 985
α-Arabinosidase
Glycosidase, β-glucosidase, α-rhamnosidase, Silanization, Immobilization, Aroma enhancement, 286
α-Chymotrypsin
Reverse micelles, Dynamic laser scatter, Extraction, Lysozyme, Pepsin, 970
Ultrafiltration membrane bioreactor, Reveresed membranes, Dipeptide synthesis, Process integration, 1064
α-Glucuronidase
Xylanase, β-xylosidase, *Trichoderma reesei*, Xylan hydrolysis, 813
11α-Hydroxylation
Progesterone, Alginate-immobilized cells, Gelling agent, Alignate gel stability, Phosphate damage, 551
Steroid transformation, Progesterone, Organic solvent, Two-phase system, Alginate-immobilized cells, Polyurea membrane, 485
α-Rhamnosidase
Glycosidase, β-glucosidase, α-arabinosidase, Silanization, Immobilization, Aroma enhancement, 286
Amidated peptides
C-terminal amidation, Peptidylglycine α-amidating enzyme, 450
Ammonia removal
Animal cell culture, Hydrophobic membrane, 957
Ammonium
Protein secretion, Endocrine cells, 90
Amperometry
Glucose sensor, Latex beads, Hydrogen peroxide, 402
Amplification assay
Flavin adenine dinucleotide-3', Apo-glucose oxidase, Ribonuclease $T_2$, 281
Animal cell culture
Ammonia removal, Hydrophobic membrane, 957
Serum requirement, Isolation method, 726
Animal fats hydrolysis
Lipase, EC 3.1.1.3, Immobilized enzyme, Organic solvents, *Candida rugosa*, 61
Anthocyanins
Immobilized plant cells, *Vitis vinifera*, Cell growth, Secondary metabolism, 416
Apo-glucose oxidase
Flavin adenine dinucleotide-3', Ribonuclease $T_2$, Amplification assay, 281
Apparent kinetic parameters
Immobilized enzyme, 349
Aqueous two-phase systems
Partition, α-amylase, pH, PEG molecular weight, Effect of NaCl, Phase volume ratio, *Bacillus subtilis*, Purification factor, Recovery, 131
Aroma enhancement
Glycosidase, β-glucosidase, α-arabinosidase, α-rhamnosidase, Silanization, Immobilization, 286
Aromatics
*Coprinus macrorhizus*, Fungal peroxidase, Phenol, Enzymatic removal, Precipitation, Polymerization, Hydrogen peroxide depletion, 120

© 1994 Butterworth-Heinemann

*Aspergillus awamori*
Xylan-degrading enzymes, Furuloyl esterase, *p*-coumaroyl esterase, Phenolic acid esterase, 826
*Aspergillus niger*
Heterologous expression, Lysozyme, Glucoamylase, Physiological factors, 276
Pectolytic enzymes, Submerged cultivation, Bioreactor experiments, Sucrose substrate, Citric acid, 703
Polysaccharides, β-glucosidase, Compartmental electrophoresis, 912
*Aspergillus niger* var. *awamori*
Parasexual cross, Chymosin, Chlorate resistance, CHEF gel electrophoresis, 376
Azocoll
Extracellular proteinase, Staining fungi, *Ophiostoma* spp., Proteolytic activity, Metal-activated serine proteinase, Liquid protein media , 602

*Bacillus*
Dextran, Dialdehyde dextran, Alkaline proteinase, Chemical modification, Detergent, 99
*Bacillus cereus*
Solid substrate fermentation, Submerged fermentation, Slurry fermentation, Cyclodextrin glycosyl transferase, Wheat bran extract, 441
*Bacillus subtilis*
Alkaline protease, Plasmid stability, 534
Aqueous two-phase systems, Partition, α-amylase, pH, PEG molecular weight, Effect of NaCl, Phase volume ratio, Purification factor, Recovery, 131
Plasmid stability, *Escherichia coli*, Fermentation, 240
Backset
Lactic acid, Wheat mash, Bacterial contaminants, 311
Bacterial contaminants
Lactic acid, Backset, Wheat mash, 311
Bacyer-Villiger oxidation
Biotransformation, Cyclohexanone monooxygenase, Bicyclic lactones, Enantioselectivity, 964
Batch culture
Hydrodynamic stress, Plant cells, Continuous culture, *Catharanthus roseus, Nicotiana tabacum, Cinchona robusta, Tabernaemontana divaricata*, 467
Beer
Esters, Fermentation, Kinetics, Stirred-tank, Industrial, 66
Immobilized cells, Yeast, Beverage industry, Fermentation technology, Physiology, 365
Benzyl alcohols
TOL plasmid, Xylene oxygenase, Styrene epoxide, 608
β1-3-D-Glucan
Exopolysaccharide, *Pleurotus florida*, Stirred-tank reactor, Airlift reactor, 566
β-Fructofuranosidase
Fructooligosaccharides, Kinetic studies, Mathematical model, 334
β-Galactosidase
Detergent effects, Cell permeabilization, *S. thermophilus*, 573
Granular starch, Starch-binding domain, Fusion protein, Adsorption, Elution, 18
*Kluyveromyces lactis*, Immobilization, Milk whey, Permeabilization, 303
*Kluyveromyces lactis*, Permeabilization, 340
β-Glucosidase
Alkyl glycoside, Water activity, Organic media, 751
Glycosidase, α-arabinosidase, α-rhamnosidase, Silanization, Immobilization, Aroma enhancement, 286
Polysaccharides, Compartmental electrophoresis, *Aspergillus niger*, 912
Streptavidin, Biotin, Cellulose-binding domain, Fusion protein, Alkaline phosphatase, Enzyme immobilization, 496
β-Glucosidases
Enzymatic transglycosylation, Monoterpene β-glucosides, 1055
β-N-Acetylhexosaminidases
*Gliocladium virens*, Enzymes, Biological control, Plant pathogens, 849
β-Xylosidase
α-glucuronidase, Xylanase, *Trichoderma reesei*, Xylan hydrolysis, 813
Beverage industry
Immobilized cells, Yeast, Beer, Fermentation technology, Physiology, 365
Bicyclic lactones
Bacyer-Villiger oxidation, Biotransformation, Cyclohexanone monooxygenase, Enantioselectivity, 964
Bilirubin oxidase
Enzymatic oxidation, 1,1′-dimethylferrocene, 1,1′-dimethylferricinium, 2-hydroxypropyl-β-cyclodextrin, Inclusion complex, Enzyme assay, 425
Binding
Metals, Cell walls, Yeast, 633
Bioactive peptides
Precipitation, Salting-out, Solubility, Hydrophobic peptides, Casein, 591
Biobleaching
Xylanase, Pulp treatment, Bleaching, Ozone, Peracetic acid, Performic acid, Caro's acid, 492
Biochemical reaction
Solid-state fermentation, Heat transfer, Packed-column fermentor, Forced aeration, 253
Biocontrol agent
Biomass production, Spore inoculum, *Idriella (Microdochium) bolleyi*, 24
Bioconversion
Maltotetraose, Malotetraohydrolase, Pullulanase, Mass balance, Membrane recycle bioreactor, *Pseudomonas stutzeri*, 1016
*T. reesei, S. cerevisiae*, Protoplast fusion, Cellulose, Ethanol, 870
Xylanase production, Fibers, Ramie, Flax, Biomass, Cellulosic fibers, Lignocellulosics, Delignification, Pulping, Bleaching, Fungi, 627
Biological control
β-N-Acetylhexosaminidases, *Gliocladium virens*, Enzymes, Plant pathogens, 849
Biomass
Xylanase production, Fibers, Ramie, Flax, Cellulosic fibers, Lignocellulosics, Delignification, Bioconversion, Pulping, Bleaching, Fungi, 627
Biomass production
Biocontrol agent, Spore inoculum, *Idriella (Microdochium) bolleyi*, 24
Biopolymer
Wood, Ligninase, Lignin peroxidase, Lignocellulose, Lignin, Cellulose, 676
Bioreactor experiments
Pectolytic enzymes, *Aspergillus niger*, Submerged cultivation, Sucrose substrate, Citric acid, 703
Bioreactors
Membrane reactor, Ultrafiltration, Enzymatic reactors, Process integration, 738
Nitrate uptake, Nitrite uptake, Phosphate uptake, Immobilized cells, Polyvinyl foam, *Phormidium laminosum*, 395
Oxygen electrode, Enzyme immobilization, Biosensors, Coupling and recycling, $NAD^+$-dependent dehydrogenase, Detection of PCMB, Detection of L-lactate and LDH, 292
Biosensor
Chemiluminescence, Fiberoptic sensor, Flow injection analysis, Enzymatic compartmentalized system, Lactate, Luminol, 979
Biosensors
Oxygen electrode, Enzyme immobilization, Bioreactors, Coupling and recycling, $NAD^+$-dependent dehydrogenase, Detection of PCMB, Detection of L-lactate and LDH, 292
Salicylate, Salicylate hydroxylase, *Pseudomonas putida*, 665
Biotin
Streptavidin, Cellulose-binding domain, Fusion protein, β-glucosidase, Alkaline phosphatase, Enzyme immobilization, 496
Biotransformation
Bacyer-Villiger oxidation, Cyclohexanone monooxygenase, Bicyclic lactones, Enantioselectivity, 964
Biphasic system
Phenylalanine methyl ester, Yeast, Phenylalanine ammonia lyase, Organic solvents, 318
Bioproduction
Alginate, Dextran, Exopolysaccharides, Immobilized cells, Pullulan, Xanthan, 1048
Bleaching
Xylanase, Pulp treatment, biobleaching, Ozone, Peracetic acid, Performic acid, Caro's acid, 492
Xylanase production, Fibers, Ramie, Flax, Biomass, Cellulosic fibers, Lignocellulosics, Delignification, Bioconversion, Pulping, Fungi, 627
*Botryococcus braunii*
Microalga, Exopolysaccharide, Nitrogen source, Photoperiod, 546
Branched alkanes
*Pseudomonas oleovorans*, Alkane hydroxylase, Substrate specificity, Alkylbenzenes, Aliphatic, Alicyclic, 904
Brewers' yeast
Electrofusion, Fusant, Flocculence, 839
Bromoperoxidase
Haloperoxidase, Chloroperoxidase, Pyrrolnitrin, 7-chlorotetracycline, *Pseudomonas pyrrocinia, Streptomyces aureofaciens*, 53

*Candida antarctica*
Enzymatic synthesis, Organic solvent, Citronellyl acetate, Lipase, 835
*Candida rugosa*
Lipase, EC 3.1.1.3, Immobilized enzyme, Animal fats hydrolysis, Organic solvents, 61

*Candida shehatae*
Hemicellulose hydrolyzate, Lignocellulose, D-xylose, Pentose sugars, Ethanol, Xylitol, Fermentation, Yeast, *Pichia stipitis*, Kinetic parameters, 944
Caro's acid
Xylanase, Pulp treatment, Biobleaching, Bleaching, Ozone, Peracetic acid, Performic acid, 492
Casein
Precipitation, Salting-out, Solubility, Hydrophobic peptides, Bioactive peptides, 591
Catalase
*Pichia pastoris*, Alcohol oxidase, Hydrogen peroxide, Production, Treated cells, 10
*Catharanthus roseus*
Hydrodynamic stress, Plant cells, Batch culture, Continuous culture, *Nicotiana tabacum, Cinchona robusta, Tabernaemontana divaricata*, 467
Celite-immobilized lipase
Interesterfication, Palm oil midfraction, Reverse micelles, Gas-lift reactor, 159
Cell growth
Immobilized plant cells, *Vitis vinifera*, Anthocyanins, Secondary metabolism, 416
Cell immobilization
Xylose, *Pichia stipitis*, Pulsing bioreactor, 72
Cell morphology
Hybridoma, Image analysis, Cell viability, 29
Cellobiase
Cellulase, CMCase, Coconut pith, Solid substrate fermentation, Pretreatment, Nutrient level, Particle size, Inoculum size, Time of fermentation, 436
Cellobiohydrolase
Cellooligosaccharides, *Trichoderma reesei*, Enzymatiuc hydrolysis, Exocellulase, Kinetic modeling, 43
Cellobiose
Cellobiose dehydrogenase (formerly cellobiose oxidase), Quinone oxidoreductase, Lignin peroxidase, Manganese peroxidase, *Phanerochaete chrysosporium*, [$^{14}$C]DHP mineralization, Lignin degradation, 771
Cellobiose dehydrogenase (formerly cellobiose oxidase)
Cellobiose, Quinone oxidoreductase, Lignin peroxidase, Manganese peroxidase, *Phanerochaete chrysosporium*, [$^{14}$C]DHP mineralization, Lignin degradation, 771
Cellooligosaccharides
Cellobiohydrolase, *Trichoderma reesei*, Enzymatic hydrolysis, Exocellulase, Kinetic modeling, 43
Cell permeabilization
β-galactosidase, Detergent effects, *S. thermophilus*, 573
Cellulase
Cellulose, Adsorption, Synergism, Thermodynamics, 649
CMCase, Cellobiase, Coconut pith, Solid substrate fermentation, Pretreatment, Nutrient level, Particle size, Inoculum size, Time of fermentation, 436
Xylanase, Mannanse, *Schizophyllum commune*, 229
Cellulase biosynthesis
*Trichoderma reesei*, Continuous culture, Lactose, Growth and maintenance parameters, Comparison with other mutants of *T. reesei* and soluble substrates, 1079
Cellulase-free xylanase
Thermophilic fungus, Jute fiber upgrading, 298
Cellulase production
*Penicillium occitanis, Trichoderma reesei*, Cellulolysis, 538
Cellulolysis
*Penicillium occitanis, Trichoderma reesei*, Cellulase production, 538
Cellulose
Cellulase, Adsorption, Synergism, Thermodynamics, 649
*T. reesei, S. cerevisiae*, Protoplast fusion, Bioconversion, Ethanol, 870
Wood, Biopolymer, Ligninase, Lignin peroxidase, Lignocellulose, Lignin, 676
Cellulose-binding domain
Streptavidin, Biotin, Fusion protein, β-glucosidase, Alkaline phosphatase, Enzyme immobilization, 496
Cellulose sulfate
Immobilization, Encapsulation, Polyelectrolyte complex microcapsules, Poly(dimethyldiallylammonium chloride), Citrate-producing microorganisms, *Yarrowia lipolytica*, Fluidized bed fermentation, 777
Cellulosic fibers
Xylanase production, Fibers, Ramie, Flax, Biomass, Lignocellulosics, Delignification, Bioconversion, Pulping, Bleaching, Fungi, 627
Cell viability
Hybridoma, Image analysis, Cell morphology, 29
Cell walls
Metals, Yeast, Binding, 633
Cephalexin production
Enzymatic conversion, Immobilized penicillin G acylase, 715
Cephalosporin C
Enzymatic transformation, Glutaryl-7-amino-cephalosporanic acid acylase, 1031, 1037
Characterization
Thermostable, α-amylase, Purification, 985
CHEF gel elctrophoresis
Parasexual cross, Chymosin, Chlorate resistance, *Aspergillus niger* var. *awamori*, 376
Chemical modification
Dextran, Dialdehyde dextran, Alkaline proteinase, Detergent, *Bacillus*, 99
Horseradish peroxidase, Thermostability, Enzyme stabilization, 501
Chemiluminescence
Biosensor, Fiberoptic sensor, Flow injection analysis, Enzymatic compartmentalized system, Lactate, Luminol, 979
Chemostat cultures
Metabolic control, Sugar uptake, Glycolysis, *Saccharomyces cerevisiae*, 761
Chitosan
Papain, Depolymerization, 110
Chlorate resistance
Parasexual cross, Chymosin, CHEF gel electrophoresis, *Aspergillus niger* var. *awamori*, 376
*Chlorella*
Accumulation, Agarose, Algae, Alginate, Immobilization, Mercury, Packed-bed reactor, Phosphate, Volatilization, 802
Chloroperoxidase
Haloperoxidase, Bromoperoxidase, Pyrrolnitrin, 7-chlorotetracycline, *Pseudomonas pyrrocinia, Streptomyces aureofaciens*, 53
7-Chlorotetracycline
Haloperoxidase, Chloroperoxidase, Bromoperoxidase, Pyrrolnitrin, *Pseudomonas pyrrocinia, Streptomyces aureofaciens*, 53
Chymosin
Parasexual cross, Chlorate resistance, CHEF gel electrophoresis, *Aspergillus niger* var. *awamori*, 376
Chymotrypsin
Subtilisin, Low-water systems, Polymerization in low-water systems, 522
*Cinchona robusta*
Hydrodynamic stress, Plant cells, Batch culture, Continuous culture, *Catharanthus roseus, Nicotiana tabacum, Tabernaemontana divaricata*, 467
Citrate-producing microorganisms
Immobilization, Encapsulation, Polyelectrolyte complex microcapsules, Poly(dimethyldiallylammonium chloride), Cellulose sulfate, *Yarrowia lipolytica*, Fluidized bed fermentation, 777
Citric acid
Pectolytic enzymes, *Aspergillus niger*, Submerged cultivation, Bioreactor experiments, Sucrose substrate, 703
Citronellyl acetate
Enzymatic synthesis, Organic solvent, *Candida antarctica*, Lipase, 835
Clinical dextran
Mixed culture, *Lipomyces starkeyi*, *Leuconostoc mesenteroides*, Dextranase, Dextransucrase, 844
Clostridium acetobutylicum
Continuous AEB fermentation, 1021
CMCase
Cellulase, Cellobiase, Coconut pith, Solid substrate fermentation, Pretreatment, Nutrient level, Particle size, Inoculum size, Time of fermentation, 436
$^{13}$C-NMR
*Saccharomyces cerevisiae*, Osmolarity, Osmotic stress, Osmoregulation, Salt stress, Ethanol, Glycerol, 207
Coconut pith
Cellulase, CMCase, Cellobiase, Solid substrate fermentation, Pretreatment, Nutrient level, Particle size, Inoculum size, Time of fermentation, 436
Coimmobilization
Enzyme ratio, Xylose, Xylulose, Flow system, 216
Collagen
Gelatin, Pepsin, Proctase, Gel strength, 756
Comparison with other mutants of *T. reesei* and soluble substrates
*Trichoderma reesei*, Continuous culture, Lactose, Growth and maintenance parameters, Cellulase biosynthesis, 1079
Compartmental electrophoresis
Polysaccharides, β-glucosidase, *Aspergillus niger*, 912
Computer control
*Escherichia coli*, Recombinant, Plasmid, Exponentially fed-batch culture, Penicillin acylase, Penicillin amidase, 895
Conjugated redox reaction
Electron transfer, NADPH regeneration, Glutathione reductase, Separated reaction system, 1026
Constitutive mutant
*Leuconostoc mesenteroides* B-512FMC,

Glucansucrase, Dextransucrase constitutive mutant, Dextransuerase subunits, Dextran stimulation, Dextransucrase dextran binding, 659
Continuous AEB fermentation
Clostridium acetobutylicum, 1021
Continuous culture
Hydrodynamic stress, Plant cells, Batch culture, *Catharanthus roseus, Nicotiana tabacum, Cinchona robusta, Tabernaemontana divaricata*, 467
*Trichoderma reesei*, Lactose, Growth and maintenance parameters, Cellulase biosynthesis, Comparison with other mutants of *T. reesei* and soluble substrates, 1079
Continuous fermentation
*Lactobacillus helveticus*, Whey permeate, Immobilized cells, Lactic acid, 457
Continuous production
$NADP^+$, Glucose-6-phosphate dehydrogenase, Immobilized, NADPH, 974
Copper
Lead, Two-phase anaerobic digester, 991
Copper alginate
Enzyme immobilization, Phenol oxidase, 151
*Coprinus macrorhizus*
Fungal peroxidase, Aromatics, Phenol, Enzymatic removal, Precipitation, Polymerization, Hydrogen peroxide depletion, 120
Coupling and recycling
Oxygen electrode, Enzyme immobilization, Biosensors, Bioreactors, $NAD^+$-dependent dehydrogenase, Detection of PCMB, Detection of L-lactate and LDH, 292
Crabtree effect
*Monascus purpureus*, Pigments, Monascorubramine, Respirofermentation, 584
Critical solvent concentrations
Organic solvents, *Morinda citrifolia*, Log P, Membrane, 642
CSTR
Kinetic resolution, Enantioselectivity, Membrane reactor, 791
C-terminal amidation
Amidated peptides, Peptidylglycine α-amidating enzyme, 450
*C. thermoaceticum*
Acetic acid, Membrane bioreactor, 104
Cyanide biodegradation
*Pseudomonas fluorescens*, Zeolite, 529
Cyclodextrin glycosyl transferase
Solid substrate fermentation, Submerged fermentation, Slurry fermentation, Wheat bran extract, *Bacillus cereus*, 441
Cyclohexanone monooxygenase
Bacyer-Villiger oxidation, Biotransformation, Bicyclic lactones, Enantioselectivity, 964

*Debaryomyces hansenii*
Xylitol, Sylose reductase, Xylitol dehydrogenase, Glucose-6-phosphate dehydrogenase, 6-phosphogluconate dehydrogenase, Alcohol dehydrogenase, Oxygen transfer rate, 1074
Debittering
Limonin, Kinnow juice, 723
Delignification
Xylanase production, Fibers, Ramie, Flax, Biomass, Cellulosic fibers, Lignocellulosics, Bioconversion, Pulping, Bleaching, Fungi, 627
Denitrification
Polyvinyl alcohol (PVA), Phosphorylated PVA gel, Esterification, Immobilization, 79
Depolymerization
Chitosan, Papain, 110
Detection of L-lactate and LDH
Oxygen electrode, Enzyme immobilization, Biosensors, Bioreactors, Coupling and recycling, $NAD^+$-dependent dehydrogenase, Detection of PCMB, 292
Detection of PCMB
Oxygen electrode, Enzyme immobilization, Biosensors, Bioreactors, Coupling and recycling, $NAD^+$-dependent dehydrogenase, Detection of L-lactate and LDH, 292
Detergent
Dextran, Dialdehyde dextran, Alkaline proteinase, Chemical modification, *Bacillus*, 99
Detergent effects
β-galactosidase, Cell permeabilization, *S. thermophilus*, 573
Dextran
Alginate, Biproduction, Exopolysaccharides, Immobilized cells, Pullulan, Xanthan, 1048
Dialdehyde dextran, Alkaline proteinase, Chemical modification, Detergent, *Bacillus*, 99
Dextranase
Clinical dextran, Mixed culture, *Lipomyces starkeyi, Leuconostoc mesenteroides*, Dextransucrase, 844
Dextransucrase subunits
*Leuconostoc mesenteroides* B-512FMC, Dextransucrase constitutive mutant, Dextransucrase subunits, Dextran stimulation, Dextransucrase dextran binding, 1010
Dextran stimulation
Constitutive mutant, *Leuconostoc mesenteroides* B-512FMC, Glucansucrase, Dextransucrase constitutive mutant, Dextransuerase subunits, Dextransucrase dextran binding, 659
*Leuconostoc mesenteroides* B-512FMC, Dextransucrase constitutive mutant, Dextransucrase subunits, Dextransucrase dextran binding, 1010
Dextransucrase
Clinical dextran, Mixed culture, *Lipomyces starkeyi, Leuconostoc mesenteroides*, Dextranase, 844
Dextransucrase constitutive mutant
Constitutive mutant, *Leuconostoc mesenteroides* B-512FMC, Glucansucrase, Dextransuerase subunits, Dextran stimulation, Dextransucrase dextran binding, 659
*Leuconostoc mesenteroides* B-512FMC, Dextransucrase constitutive mutant, Dextransucrase subunits, Dextran stimulation, Dextransucrase dextran binding, 1010
Dextransucrase dextran binding
Constitutive mutant, *Leuconostoc mesenteroides* B-512FMC, Glucansucrase, Dextransucrase constitutive mutant, Dextransuerase subunits, Dextran stimulation, 659
*Leuconostoc mesenteroides* B-512FMC, Dextransucrase constitutive mutant, Dextransucrase subunits, Dextran stimulation, 1010
Dextransucrase subunits
*Leuconostoc mesenteroides* B-512FMC, Dextransucrase constitutive mutant, Dextran stimulation, Dextransucrase dextran binding, 1010
Dextransuerase subunits
Constitutive mutant, *Leuconostoc mesenteroides* B-512FMC, Glucansucrase, Dextransucrase constitutive mutant, Dextran stimulation, Dextransucrase dextran binding, 659
[$^{14}$C]DHP mineralization
Cellobiose dehydrogenase (formerly cellobiose oxidase), Cellobiose, Quinone oxoreductase, Lignin peroxidase, Manganese peroxidase, *Phanerochaete chrysosporium*, Lignin degradation, 771
Dialdehyde dextran
Dextran, Alkaline proteinase, Chemical modification, Detergent, *Bacillus*, 99
Dialysis
Hybridomas, Perfusion, Monoclonal antibody, Metabolism, Mathematical model, 688
1,1′-Dimethylferricinium
Bilirubin oxidation, Enzymatic oxidation, 1,1'-dimethylferrocene, 2-hydroxypropyl-β-cyclodextrin, Inclusion complex, Enzyme assay, 425
1,1′-Dimethylferrocene
Bilirubin oxidation, Enzymatic oxidation, 1,1'-dimethylferricinium, 2-hydroxypropyl-β-cyclodextrin, Inclusion complex, Enzyme assay, 425
Dioleylglycerol
Lipase, Monoacylglycerols, Triolein, Monooleylglycerol, Glycerolysis, Activity, Stability, Immobilization, 864
Dipeptide synthesis
Ultrafiltration membrane bioreactor, Reversed membranes, Process integration, α-chymotrypsin, 1064
Disaccharides
Glucoamylase, Trisaccharides, 2-methoxyethyl ether, 2-ethoxyethyl ether, Triethylene glycol dimethyl ether, Kinetics, Stability, Solubility, 383
D-xylose
Hemicellulose hydrolyzate, Lignocellulose, Pentose sugars, Ethanol, Xylitol, Fermentation, Yeast, *Candida shehatae, Pichia stipitis*, Kinetic parameters, 944
*Pichia stipitis*, Inhibition, Kinetics, Immobilization, Microcalorimetry, 622
D-Xylulose
Enzymatic isomerization, Precipitation, Ion-exchange chromatography, 388
Dynamical modeling
Microbial growth, Glucose fermentation, Mixed acid production, pH profile prediction, 163
Dynamic laser scatter
Reverse micelles, Extraction, Lysozyme, α-chymotrypsin, Pepsin, 970

EC 3.1.1.3
Lipase, Immobilized enzyme, Animal fats hydrolysis, Organic solvents, *Candida rugosa*, 61
Effect of NaCl
Aqueous two-phase systems, Partition, α-amylase, pH, PEG molecular weight, Phase volume ratio, *Bacillus subtilis*,

Purification factor, Recovery, 131
Electrofusion
Brewers' yeast, Fusant, Flocculence, 839
Electron transfer
NADPH regeneration, Glutathione reductase, Conjugated redox reaction, Separated reaction system, 1026
Electrosynthesis
Lysozyme, Tyrosine, 795
Elution
Granular starch, Starch-binding domain, β-galactosidase, Fusion protein, Adsorption, 18
Emulsion system
*Pseudomonas fluorescens* lipase, Hydrolysis, Lipase adsorption, Particle size analysis, Interfacial area, Product inhibition, Interfacial properties, Alcoholysis, 513
Enantioselective esterification
Glycidol, Lipase, Supercritical carbon dioxide, 785
Enantioselectivity
Bacyer-Villiger oxidation, Biotransformation, Cyclohexanone monooxygenase, Bicyclic lactones, 964
Kinetic resolution, CSTR, Membrane reactor, 791
Naproxen, Esterification, Lipase, 328
Racemic glycidol, Oxidation, *Acetobacter pasteurianus*, 1059
Encapsulation
Immobilization, Polyelectrolyte complex microcapsules, Poly(dimethyldiallylammonium chloride), Cellulose sulfate, Citrate-production microorganisms, *Yarrowia lipolytica*, Fluidized bed fermentation, 777
Endocrine cells
Ammonium, Protein secretion, 90
Enzymatic activity
Reverse micelles, Reverse vesicles, Polyphenol oxidase, 409
Enzymatic compartmentalized system
Biosensor, Chemiluminescence, Fiberoptic sensor, Flow injection analysis, Lactate, Luminol, 979
Enzymatic conversion
Cephalexin production, Immobilized penicillin G acylase, 715
Enzymatic hydrolysis
Cellooligosaccharides, Cellobiohydrolase, *Trichoderma reesei*, Exocellulase, Kinetic modeling, 43
Enzymatic isomerization
D-Xylulose, Precipitation, Ion-exchange chromatography, 388
Enzymatic oxidation
Bilirubin oxidation, 1,1'-dimethylferrocene, 1,1'-dimethylferricinium, 2-hydroxypropyl-β-cyclodextrin, Inclusion complex, Enzyme assay, 425
Enzymatic peptide synthesis in organic solvent with low water content
Ethyl-chymotrypsin, Acyl transfer reaction, 596
Enzymatic reactors
Membrane reactor, Ultrafiltration, Process integration, Bioreactors, 738
Enzymatic removal
*Coprinus macrorhizus*, Fungal peroxidase, Aromatics, Phenol, Precipitation, Polymerization, Hydrogen peroxide depletion, 120
Enzymatic synthesis
Alkyl glycoside, Alkyl glycoside fatty acid esters, Lipases, Organic solvent, Transesterification, 115
Organic solvent, Citronellyl acetate, *Candida antarctica*, Lipase, 835
Enzymatic transformation
Cephalosporin C, Glutaryl-7-amino-cephalosporanic acid acylase, 1031, 1037
Enzymatic transglycosylation
β-glucosidases, Monoterpene β-glucosides, 1055
Enzyme assay
Bilirubin oxidation, Enzymatic oxidation, 1,1'-dimethylferrocene, 1,1'-dimethylferricinium, 2-hydroxypropyl-β-cyclodextrin, Inclusion complex, 425
Enzyme immobilization
Oxygen electrode, Biosensors, Bioreactors, Coupling and recycling, $NAD^+$-dependent dehydrogenase, Detection of PCMB, Detection of L-lactate and LDH, 292
Phenol oxidase, Copper alginate, 151
Streptavidin, Biotin, Cellulose-binding domain, Fusion protein, β-glucosidase, Alkaline phosphatase, 496
Enzyme ratio
Coimmobilization, Xylose, Xylulose, Flow system, 216
Enzymes
β-N-Acetylhexosaminidases, *Gliocladium virens*, Biological control, Plant pathogens, 849
Enzyme stabilization
Horseradish peroxidase, Thermostability, Chemical modification, 501
*Escherichia coli*
Plasmid stability, *Bacillus subtilis*, Fermentation, 240
Recombinant, Plasmid, Exponentially fed-batch culture, Penicillin acylase, Penicillin amidase, Computer control, 895
Esterification
Enantioselectivity, Naproxen, Lipase, 328
Microaqueous enzymology, Lipase, Acyl-transfer, Organic solvents, Solvent suitability, Substrate polarity, 577
Polyvinyl alcohol (PVA), Phosphorylated PVA gel, Denitrification, Immobilization, 79
Esters
Beer, Fermentation, Kinetics, Stirred-tank, Industrial, 66
Ethanol
Hemicellulose hydrolyzate, Lignocellulose, D-xylose, Pentose sugars, Xylitol, Fermentation, Yeast, *Candida shehatae, Pichia stipitis*, Kinetic parameters, 944
Pigments, *Monascus purpureus*, 996
*Saccharomyces cerevisiae*, Osmolarity, $^{13}C$-NMR, Osmotic stress, Osmoregulation, Salt stress, Glycerol, 207
*T. reesei, S. cerevisiae*, Protoplast fusion, Cellulose, Bioconversion, 870
Zeolite, Fermentation, Sugarcane, Molasses, 719
Ethanol production
Yeasts, Xylose fermentation, Oxygen relations, 933
Ethanol tolerance
Extracellular acidification, Proton pumping, Plasma membrane $H^+$-ATPase, Passive $H^+$-influx, Ethanol toxicity, *Saccharomyces cerevisiae, Kluyveromyces marxianus*, 808
Ethanol toxicity
Extracellular acidification, Proton pumping, Plasma membrane $H^+$-ATPase, Passive $H^+$-influx, Ethanol tolerance, *Saccharomyces cerevisiae, Kluyveromyces marxianus*, 808
2-Ethoxyethyl ether
Glucoamylase, Disaccharides, Trisaccharides, 2-methoxyethyl ether, Triethylene glycol dimethyl ether, Kinetics, Stability, Solubility, 383
Ethyl-chymotrypsin
Acyl transfer reaction, Enzymatic peptide synthesis in organic solvent with low water content, 596
Exocellulase
Cellooligosaccharides, Cellobiohydrolase, *Trichoderma reesei*, Enzymatic hydrolysis, Kinetic modeling, 43
Exoglucanase
*Ruminococcus*, Monoclonal antibody, Inhibition, 2
Exopolysaccharide
β1-3-D-Glucan, *Pleurotus florida*, Stirred-tank reactor, Airlift reactor, 566
*Botryococcus braunii*, Microalga, Nitrogen source, Photoperiod, 546
Exopolysaccharides
Alginate, Biproduction, Dextran, Immobilized cells, Pullulan, Xanthan, 1048
Exponentially fed-batch culture
*Escherichia coli*, Recombinant, Plasmid, Penicillin acylase, Penicillin amidase, Computer control, 895
Extracellular acidification
Proton pumping, Plasma membrane $H^+$-ATPase, Passive $H^+$-influx, Ethanol toxicity, Ethanol tolerance, *Saccharomyces cerevisiae, Kluyveromyces marxianus*, 808
Extracellular proteinase
Staining fungi, *Ophiostoma* spp., Proteolytic activity, Metal-activated serine proteinase, Liquid protein media, Azocoll, 602
Extraction
Reverse micelles, Dynamic laser scatter, Lysozyme, α-chymotrypsin, Pepsin, 970
Extreme halophile
Protease, *Halobacterium halobium*, Peptide synthesis, 266

Factors affecting
$NAD^+$ kinase, Immobilized, $NADP^+$, 236
Fatty acid
Lipase, Solvent, Hydrolysis, 432
Fed-batch culture
Poly(3-hydroxybutyric-co-3-hydroxyvaleric acid), P(3HB-co-3HV), *Alcaligenes eutrophus*, High cell density culture, On-line glucose analyzer, Substrate concentration control, 556
Fermentation
Esters, Beer, Kinetics, Stirred-tank, Industrial, 66
Plasmid stability, *Bacillus subtilis, Escherichia coli*, 240
Zeolite, Ethanol, Sugarcane, Molasses, 719
Xylose, Strain selection, Taxonomy, Genetics, Yeast, 922
Hemicellulose hydrolyzate, Lignocellulose, D-xylose, Pentose sugars, Ethanol, Xylitol, Yeast, *Candida shehatae, Pichia stipitis*, Kinetic parameters, 944
Fermentation technology
Immobilized cells, Yeast, Beer, Beverage industry, Physiology, 365

Feruloyl estarase
Xylan-degrading enzymes, *Aspergillus awamori*, *p*-coumaroyl esterase, Phenolic acid esterase, 826
Fiberoptic sensor
Biosensor, Chemiluminescence, Flow injection analysis, Enzymatic compartmentalized system, Lactate, Luminol, 979
Fibers
Xylanase production, Ramie, Flax, Biomass, Cellulosic fibers, Lignocellulosics, Delignification, Bioconversion, Pulping, Bleaching, Fungi, 627
Flavin adenine dinucleotide-3'-phosphate
Apo-glucose oxidase, Ribonuclease $T_2$, Amplification assay, 281
Flax
Xylanase production, Fibers, Ramie, Biomass, Cellulosic fibers, Lignocellulosics, Delignification, Bioconversion, Pulping, Bleaching, Fungi, 627
Flocculence
Electrofusion, Brewers' yeast, Fusant, 839
Flow injection analysis
Biosensor, Chemiluminescence, Fiberoptic sensor, Enzymatic compartmentalized system, Lactate, Luminol, 979
Flow system
Enzyme ratio, Coimmobilization, Xylose, Xylulose, 216
Fluidized bed fermentation
Immobilization, Encapsulation, Polyelectrolyte complex microcapsules, Poly(dimethyldiallylammonium chloride), Cellulose sulfate, Citrate-producing microorganisms, *Yarrowia lipolytica*, 777
Forced aeration
Solid-state fermentation, Heat transfer, Packed-column fermentor, Biochemical reaction, 253
Fructooligosaccharides
Kinetic studies, Mathematical model, β-fructofuranosidase, 334
Fuel alcohol
Very high gravity fermentation, VHG, Protease, Wheat, 683
Fungal peroxidase
*Coprinus macrorhizus*, Aromatics, Phenol, Enzymatic removal, Precipitation, Polymerization, Hydrogen peroxide depletion, 120
Fungi
Xylanase production, Fibers, Ramie, Flax, Biomass, Cellulosic fibers, Lignocellulosics, Delignification, Bioconversion, Pulping, Bleaching, 627
Furuloyl esterase
Xylan-degrading enzymes, *Aspergillus awamori*, *p*-coumaroyl esterae, Phenolic acid esterase, 826
Fusant
Electrofusion, Brewers' yeast, Flocculence, 839
Fusion protein
Granular starch, Starch-binding domain, β-galactosidase, Adsorption, Elution, 18
Streptavidin, Biotin, Cellulose-binding domain, β-glucosidase, Alkaline phosphatase, Enzyme immobilization, 496

Gas-lift reactor
Interesterfication, Palm oil midfraction, Celite-immobilized lipase, Reverse micelles, 159
Gelatin
Collagen, Pepsin, Proctase, Gel strength, 756
Gelling agent
11α-hydroxylation, Progesterone, Alginate-immobilized cells, Alignate gel stability, Phosphate damage, 551
Gel strength
Collagen, Gelatin, Pepsin, Proctase, 756
Genetics
Xylose, Strain selection, Taxonomy, Yeast, Fermentation, 922
*Gliocladium virens*
β-N-Acetylhexosaminidases, Enzymes, Biological control, Plant pathogens, 849
Glucansucrase
Constitutive mutant, *Leuconostoc mesenteroides* B-512FMC, Dextransucrase constitutive mutant, Dextransuerase subunits, Dextran stimulation, Dextransucrase dextran binding, 659
Glucoamylase
Disaccharides, Trisaccharides, 2-methoxyethyl ether, 2-ethoxyethyl ether, Triethylene glycol dimethyl ether, Kinetics, Stability, Solubility, 383
Heterologous expression, *Aspergillus niger*, Lysozyme, Physiological factors, 276
*Hormoconis resinae*, *Trichoderma reesei*, Purification, Recombinant, 36
Glucose-6-phosphate dehydrogenase
*Debaryomyces hansenii*, Xylitol, Xylose reductase, Xylitol dehydrogenase, 6-phosphogluconate dehydrogenase, Alcohol dehydrogenase, Oxygen transfer rate, 1074
$NADP^+$, Immobilized, NADPH, Continuous production, 974
Glucose fermentation
Microbial growth, Mixed acid production, Dynamical modeling, pH profile prediction, 163
Glucose sensor
Latex beads, Hydrogen peroxide, Amperometry, 402
Glucose/xylose isomerase
Unfolding and refolding, *Streptomyces*, 323
Glutaryl-7-amino-cephalosporanic acid acylase
Enzymatic transformation, Cephalosporin C, 1031, 1037
Glutathione reductase
Electron transfer, NADPH regeneration, Conjugated redox reaction, Separated reaction system, 0S
Glycerol
Propionic acid, *Propionibacterium*, Membrane bioreactor, 883
*Saccharomyces cerevisiae*, Osmolarity, $^{13}C$-NMR, Osmotic stress, Osmoregulation, Salt stress, Ethanol, 207
Whey permeate, *Kluyveromyces marxianus*, *Pichia farinosa*, Sulfite, 143
Glycerolysis
Lipase, Monoacylglycerols, Triolein, Dioleylglycerol, Monooleylglycerol, Activity, Stability, Immobilization, 864
Glycidol
Enantioselective esterification, Lipase, Supercritical carbon dioxide, 785
Glycolysis
Metabolic control, Sugar uptake, *Saccharomyces cerevisiae*, Chemostat cultures, 761
Glycosidase
β-glucosidase, α-arabinosidase, α-rhamnosidase, Silanization, Immobilization, Aroma enhancement, 286
Glycosylation, (biosynthetic pathways control of, enzymes involved in, biological significance of, commercial implications of, role in pharmacokinetics, role in antigenicity, role in solubility), Oligosaccharides (methods used in analysis of), Glycosyltransferases (cell distribution), 354
Glycosyltransferases (cell distribution)
Glycosylation (biosynthetic pathways control of, enzymes involved in, biological significance of, commercial implications of, role in pharmacokinetics, role in antigenicity, role in solubility), Oligosaccharides (methods used in analysis of), 354
Growth and maintenance parameters
*Trichoderma reesei*, Continuous culture, Lactose, Cellulase biosynthesis, Comparison with other mutants of *T. reesei* and soluble substrates, 1079
Granular starch
Starch-binding domain, β-galactosidase, Fusion protein, Adsorption, Elution, 18

*Halobacterium halobium*
Protease, Extreme halophile, Peptide synthesis, 266
Haloperoxidase
Chloroperoxidase, Bromoperoxidase, Pyrrolnitrin, 7-chlorotetracycline, *Pseudomonas pyrrocinia*, *Streptomyces aureofaciens*, 53
Hard and soft metals
*Rhizopus arrhizus*, Metal ions, Adsorption, Isotherms, 671
Heat transfer
Solid-state fermentation, Packed-column fermentor, Biochemical reaction, Forced aeration, 253
Hemicellulose hydrolyzate
Lignocellulose, D-xylose, Pentose sugars, Ethanol, Xylitol, Fermentation, Yeast, *Candida shehatae*, *Pichia stipitis*, Kinetic parameters, 944
Heterologous expression
*Aspergillus niger*, Lysozyme, Glucoamylase, Physiological factors, 276
Hexadecanolide
Lipase, 16-hydroxyhexadecanoic acid, Microaqueous system, 855
High cell density culture
Poly(3-hydroxybutyric-co-3-hydroxyvaleric acid), P(3HB-co-3HV), *Alcaligenes eutrophus*, Fed-batch culture, On-line glucose analyzer, Substrate concentration control, 556
*Hormoconis resinae*
Glucoamylase, *Trichoderma reesei*, Purification, Recombinant, 36
Horseradish peroxidase
Lignin, Peroxidases, Lignin peroxidase, 125
Thermostability, Enzyme stabilization, Chemical modification, 501
Hybridoma
Image analysis, Cell viability, Cell morphology, 29
Hybridomas
Perfusion, Dialysis, Monoclonal antibody, Metabolism, Mathematical model, 688
Hydrodynamic stress
Plant cells, Batch culture, Continuous culture, *Catharanthus roseus*, *Nicotiana*

*tabacum, Cinchona robusta, Tabernaemontana divaricata*, 467
Hydrogen peroxide
Glucose sensor, Latex beads, Amperometry, 402
*Pichia pastoris*, Alcohol oxidase, Catalase, Production, Treated cells, 10
Hydrogen peroxide depletion
*Coprinus macrorhizus*, Fungal peroxidase, Aromatics, Phenol, Enzymatic removal, Precipitation, Polymerization, 120
Hydrolysis
Lipase, Organic solvents, Alcoholysis, 2-monoglycerides, Water activity, Operational stability, 1042
Lipase, Solvent, Fatty acid, 432
*Pseudomonas fluorescens* lipase, Emulsion system, Lipase adsorption, Particle size analysis, Interfacial area, Product inhibition, Interfacial properties, Alcoholysis, 513
Hydrophobic membrane
Animal cell culture, Ammonia removal, 957
Hydrophobic peptides
Precipitation, Salting-out, Solubility, Bioactive peptides, Casein, 591
16-Hydroxyhesaceccanoic acid
Lipase, Hexadecanolide, Microaqueous system, 855
2-Hydroxyupropyl-β-cyclodextrin
Bilirubin oxidation, Enzymatic oxidation, 1,1′-dimethylferrocene, 1,1′-dimethylferricinium, Inclusion complex, Enzyme assay, 425

*Idriella (Microdochium) bolleyi*
Biocontrol agent, Biomass production, Spore inoculum, 24
Image analysis
Hybridoma, Cell viability, Cell morphology, 29
Immobilization
Accumulation, Agarose, Algae, Alginate, *Chlorella*, Mercury, Packed-bed reactor, Phosphate, Volatilization, 802
Encapsulation, Polyelectrolyte complex microcapsules, Poly(dimethyldiallylammonium chloride), Cellulose sulfate, Citrate-production microorganisms, *Yarrowia lipolytica*, Fluidized bed fermentation, 777
Glycosidase, β-glucosidase, α-arabinosidase, α-rhamnosidase, Silanization, Aroma enhancement, 286
*Kluyveromyces lactis*, Milk whey, β-galactosidase, Permeabilization, 303
Lipase, Monoacylglycerols, Triolein, Dioleylglycerol, Monooleylglycerol, Glycerolysis, Activity, Stability, 864
*Pichia stipitis*, D-xylose, Inhibition, Kinetics, Microcalorimetry, 622
Polyvinyl alcohol (PVA), Phosphorylated PVA gel, Esterification, Denitrification, 79
Immobilized
$NAD^+$ kinase, $NADP^+$ production, Factors affecting, 236
$NADP^+$, Glucose-6-phosphate dehydrogenase, NADPH, Continuous production, 974
Immobilized cells
Alginate, Biproduction, Dextran, Exopolysaccharides, Pullulan, Xanthan, 1048
*Lactobacillus helveticus*, Whey permeate, Continuous fermentation, Lactic acid, 457
Nitrate uptake, Nitrite uptake, Phosphate uptake, Polyvinyl foam, Bioreactors, *Phormidium laminosum*, 395
Sterol, Side-chain degradation, *Mycobacterium* sp., Organic solvents, 708
Yeast, Beer, Beverage industry, Fermentation technology, Physiology, 365
Immobilized enzyme
Apparent kinetic parameters, 349
Lipase, EC 3.1.1.3, Animal fats hydrolysis, Organic solvents, *Candida rugosa*, 61
Immobilized enzyme kinetics, 347
Immobilized penicillin G acylase
Cephalexin production, Enzymatic conversion, 715
Immobilized plant cells
*Vitis vinifera*, Anthocyanins, Cell growth, Secondary metabolism, 416
Inclusion complex
Bilirubin oxidation, Enzymatic oxidation, 1,1′-dimethylferrocene, 1,1′-dimethylferricinium, 2-hydroxypropyl-β-cyclodextrin, Enzyme assay, 425
Industrial
Esters, Beer, Fermentation, Kinetics, Stirred-tank, 66
Inhibition
Exoglucanase, *Ruminococcus*, Monoclonal antibody, 2
*Pichia stipitis*, D-xylose, Kinetics, Immobilization, Microcalorimetry, 622
Inoculum size
Cellulase, CMCase, Cellobiase, Coconut pith, Solid substrate fermentation, Pretreatment, Nutrient level, Particle size, Time of fermentation, 436
Insect cell culture
Oxygen concentration, *Spodoptera frugiperda*, Perfusion culture, Stirred-tank bioreactor, Serum-free medium, 506
Interesterification
Palm oil midfraction, Celite-immobilized lipase, Reverse micelles, Gas-lift reactor, 159
Alcoholysis, Lipase, Operational stability, Silica gel, Adsorption, 478
Interfacial area
*Pseudomonas fluorescens* lipase, Hydrolysis, Emulsion system, Lipase adsorption, Particle size analysis, Product inhibition, Interfacial properties, Alcoholysis, 513
Interfacial properties
*Pseudomonas fluorescens* lipase, Hydrolysis, Emulsion system, Lipase adsorption, Particle size analysis, Interfacial area, Product inhibition, Alcoholysis, 513
Ion-exchange chromatography
D-Xylulose, Enzymatic isomerization, Precipitation, 388
Isoamylase
*Pseudomonas amyloderamosa*, Raw starch adsorption, 247
Isolation method
Animal cell culture, Serum requirement, 726
Isotherms
*Rhizopus arrhizus*, Metal ions, Adsorption, Hard and soft metals, 671

Jute fiber upgrading
Cellulase-free xylanase, Thermophilic fungus, 298

Kinetic modeling
Cellooligosaccharides, Cellobiohydrolase, *Trichoderma reesei*, Enzymatic hydrolysis, Exocellulase, 43
Kinetic parameters
Hemicellulose hydrolyzate, Lignocellulose, D-xylose, Pentose sugars, Ethanol, Xylitol, Fermentation, Yeast, *Candida shehatae, Pichia stipitis*, 944
Kinetic resolution
Enantioselectivity, CSTR, Membrane reactor, 791
Kinetics
Esters, Beer, Fermentation, Stirred-tank, Industrial, 66
Glucoamylase, Disaccharides, Trisaccharides, 2-methoxyethyl ether, 2-ethoxyethyl ether, Triethylene glycol dimethyl ether, Stability, Solubility, 383
*Pichia stipitis*, D-xylose, Inhibition, Immobilization, Microcalorimetry, 622
Kinetic studies
Fructooligosaccharides, Mathematical model, β-fructofuranosidase, 334
Kinnow juice
Limonin, Debittering, 723
*Kluyveromyces lactis*
β-galactosidase, Permeabilization, 340
Immobilization, Milk whey, β-galactosidase, Permeabilization, 303
*Kluyveromyces marxianus*
Extracellular acidification, Proton pumping, Plasma membrane $H^+$-ATPase, Passive $H^+$-influx, Ethanol toxicity, Ethanol tolerance, *Saccharomyces cerevisiae*, 808
Whey permeate, Glycerol, *Pichia farinosa*, Sulfite, 143

Lactate
Biosensor, Chemiluminescence, Fiberoptic sensor, Flow injection analysis, Enzymatic compartmentalized system, Luminol, 979
Lactic acid
Backset, Wheat marsh, Bacterial contaminants, 311
*Lactobacillus helveticus*, Whey permeate, Continuous fermentation, Immobilized cells, 457
*Lactobacillus helveticus*
Whey permeate, Continuous fermentation, Immobilized cells, Lactic acid, 457
Lactose
*Trichoderma reesei*, Continuous culture, Growth and maintenance parameters, Cellulase biosynthesis, Comparison with other mutants of *T. reesei* and soluble substrates, 1079
Latex beads
Glucose sensor, Hydrogen peroxide, Amperometry, 402
Lead
Copper, Two-phase anaerobic digester, 991
*Leuconostoc mesenteroides*
Clinical dextran, Mixed culture, *Lipomyces starkeyi*, Dextranase, Dextransucrase, 844
*Leuconostoc mesenteroides* B-512FMC
Dextransucrase, Destransucrase constitutive mutant, Dextransucrase subunits, Dextran stimulation, Dextransucrase dextran binding, 1010
Dextransucrase, Constitutive mutant Glucansucrase, Dextransucrase constitutive mutant, Dextransuerase subunits,

Dextran stimulation, Dextransucrase dextran binding, 659
Lignin
Peroxidases, Lignin peroxidase, Horseradish peroxidase, 125
Wood, Biopolymer, Ligninase, Lignin peroxidase, Lignocellulose, Cellulose, 676
Ligninase
Wood, Biopolymer, Lignin peroxidase, Lignocellulose, Lignin, Cellulose, 676
Lignin degradation
Cellobiose dehydrogenase (formerly cellobiose oxidase), Cellobiose, Quinone oxoreductase, Lignin peroxidase, Manganese peroxidase, *Phanerochaete chrysosporium*, [$^{14}$C]DHP mineralization, 771
Lignin peroxidase
Cellobiose dehydrogenase (formerly cellobiose oxidase), Cellobiose, Quinone oxoreductase, Manganese peroxidase, *Phanerochaete chrysosporium*, [$^{14}$C]DHP mineralization, Lignin degradation, 771
Lignin, Peroxidases, Horseradish peroxidase, 125
Wood, Biopolymer, Ligninase, Lignocellulose, Lignin, Cellulose, 676
Lignocellulose
Hemicellulose hydrolyzate, D-xylose, Pentose sugars, Ethanol, Xylitol, Fermentation, Yeast, *Candida shehatae, Pichia stipitis*, Kinetic parameters, 944
Wood, Biopolymer, Ligninase, Lignin peroxidase, Lignin, Cellulose, 676
Lignocellulosics
Xylanase production, Fibers, Ramie, Flax, Biomass, Cellulosic fibers, Delignification, Bioconversion, Pulping, Bleaching, Fungi, 627
Limonin
Kinnow juice, Debittering, 723
Lipase
16-hydroxyhexadecanoic acid, Hexadecanolide, Microaqueous system, 855
Alcoholysis, Interesterification, Operational stability, Silica gel, Adsorption, 478
EC 3.1.1.3, Immobilized enzyme, Animal fats hydrolysis, Organic solvents, *Candida rugosa*, 61
Enantioselectivity, Naproxen, Esterification, 328
Enzymatic synthesis, Organic solvent, Citronellyl acetate, *Candida antarctica*, 835
Glycidol, Enantioselective esterification, Supercritical carbon dioxide, 785
Microaqueous enzymology, Esterification, Acyl-transfer, Organic solvents, Solvent suitability, Substrate polarity, 577
Monoacylglycerols, Triolein, Dioleylglycerol, Monooleylglycerol, Glycerolysis, Activity, Stability, Immobilization, 864
Organic solvents, Alcoholysis, Hydrolysis, 2-monoglycerides, Water activity, Operational stability, 1042
Solvent, Hydrolysis, Fatty acid, 432
Lipase adsorption
*Pseudomonas fluorescens* lipase, Hydrolysis, Emulsion system, Particle size analysis, Interfacial area, Product inhibition, Interfacial properties, Alcoholysis, 513
Lipases
Alkyl glycoside, Alkyl glycoside fatty acid esters, Enzymatic synthesis, Organic solvent, Transesterification, 115
*Lipomyces starkeyi*
Clinical dextran, Mixed culture, *Leuconostoc mesenteroides*, Dextranase, Dextransucrase, 844
Liquid protein media
Extracellular proteinase, Staining fungi, *Ophiostoma* spp., Proteolytic activity, Metal-activated serine proteinase, Azocoll, 602
Log P
Organic solvents, *Morinda citrifolia*, Critical solvent concentrations, Membrane, 642
Low-water systems
Chymotrypsin, Subtilisin, Polymerization in low-water systems, 522
Luminol
Biosensor, Chemiluminescence, Fiberoptic sensor, Flow injection analysis, Enzymatic compartmentalized system, Lactate, 979
Lysozyme
Electrosynthesis, Tyrosine, 795
Heterologous expression, *Aspergillus niger*, Glucoamylase, Physiological factors, 276
Reverse micelles, Dynamic laser scatter, Extraction, α-chymotrypsin, Pepsin, 970

Maltotetraohydrolase
Bioconversion, Maltotetraose, Pullulanase, Mass balance, Membrane recycle bioreactor, *Pseudomonas stutzeri*, 1016
Maltotetraose
Bioconversion, Maltotraohydrolase, Pullulanase, Mass balance, Membrane recycle bioreactor, *Pseudomonas stutzeri*, 1016
Manganese peroxidase
Cellobiose dehydrogenase (formerly cellobiose oxidase), Cellobiose, Quinone oxoreductase, Lignin peroxidase, *Phanerochaete chrysosporium*, [$^{14}$C]DHP mineralization, Lignin degradation, 771
Mannanse
Xylanase, Cellulase, *Schizophyllum commune*, 229
Mass balance
Bioconversion, Maltotetraose, Maltotetraohydrolase, Pullulanase, Membrane recycle bioreactor, *Pseudomonas stutzeri*, 1016
Mathematical model
Fructooligosaccharides, Kinetic studies, β-fructofuranosidase, 334
Hybridomas, Perfusion, Dialysis, Monoclonal antibody, Metabolism, 688
Membrane
Organic solvents, *Morinda citrifolia*, Log P, Critical solvent concentrations, 642
Membrane bioreactor
Acetic acid, *C. thermoaceticum*, 104
Propionic acid, *Propionibacterium*, Glycerol, 883
Membrane reactor
Kinetic resolution, Enantioselectivity, CSTR, 791
Ultrafiltration, Enzymatic reactors, Process integration, Bioreactors, 738
Membrane recycle bioreactor
Bioconversion, Maltotetraose, Maltotetraohydrolase, Pullulanase, Mass balance, *Pseudomonas stutzeri*, 1016
Mercury
Accumulation, Agarose, Algae, Alginate, *Chlorella*, Immobilization, Packed-bed reactor, Phosphate, Volatilization, 802
Metabolic control
Sugar uptake, Glycolysis, *Saccharomyces cerevisiae*, Chemostat cultures, 761
Metabolism
Hybridomas, Perfusion, Dialysis, Monoclonal antibody, Mathematical model, 688
Metal-activated serine proteinase
Extracellular proteinase, Staining fungi, *Ophiostoma* spp., Proteolytic activity, Liquid protein media, Azocoll, 602
Metal ions
*Rhizopus arrhizus*, Adsorption, Isotherms, Hard and soft metals, 671
Metals
Cell walls, Yeast, Binding, 633
*Metarhizium anisopliae*
Solid state fermentation, Water balance, 562
2-Methoxyethyl ether
Glucoamylase, Disaccharides, Trisaccharides, 2-ethoxyethyl ether, Triethylene glycol dimethyl ether, Kinetics, Stability, Solubility, 383
Microalga
*Botryococcus braunii*, Exopolysaccharide, Nitrogen source, Photoperiod, 546
Microaqueous enzymology
Lipase, Esterification, Acyl-transfer, Organic solvents, Solvent suitability, Substrate polarity, 577
Microaqueous system
Lipase, 16-hydroxyhexadecanoic acid, Hexadecanolide, 855
Microbial growth
Glucose fermentation, Mixed acid production, Dynamical modeling, pH profile prediction, 163
Microcalorimetry
*Pichia stipitis*, D-xylose, Inhibition, Kinetics, Immobilization, 622
Milk whey
*Kluyveromyces lactis*, Immobilization, β-galactosidase, Permeabilization, 303
Mixed acid production
Microbial growth, Glucose fermentation, Dynamical modeling, pH profile prediction, 163
Mixed culture
Clinical dextran, *Lipomyces starkeyi, Leuconostoc mesenteroides*, Dextranase, Dextransucrase, 844
Molasses
Zeolite, Ethanol, Fermentation, Sugarcane, 719
Monascorubramine
*Monascus purpureus*, Pigments, Crabtree effect, Respirofermentation, 584
*Monascus purpureus*
Ethanol, Pigments, 996
Pigments, *Monascorubramine*, Crabtree effect, Respirofermentation, 584
Monoacylglycerols
Lipase, Triolein, Dioleylglycerol, Monooleylglycerol, Glycerolysis, Activity, Stability, Immobilization, 864
Monoclonal antibody
Exoglucanase, *Ruminococcus*, Inhibition, 2
Hybridomas, Perfusion, Dialysis, Metabolism, Mathematical model, 688
2-Monoglycerides
Lipase, Organic solvents, Alcoholysis, Hydrolysis, Water activity, Operational stability, 1042

Monooleylglycerol
Lipase, Monoacylglycerols, Triolein, Dioleylglycerol, Glycerolysis, Activity, Stability, Immobilization, 864
Monooxygenase
Xylene oxygenase, Styrene epoxide, Two-liquid phase, *n*-octane, 887
Monoterpene β-glucosides
β-glucosidases, Enzymatic transglycosylation, 1055
*Morinda citrifolia*
Organic solvents, Log P, Critical solvent concentrations, Membrane, 642
Mutagenesis
Xylanase, Thermostable enzyme, *Streptomyces lividans*, 420
*Mycobacterium* sp.
Sterol, Side-chain degradation, Immobilized cells, Organic solvents, 708

$NAD^+$-dependent dehydrogenase
Oxygen electrode, Enzyme immobilization, Biosensors, Bioreactors, Coupling and recycling, Detection of PCMB, Detection of L-lactate and LDH, 292
$NAD^+$ kinase
Immobolized $NADP^+$ production, Factors affecting, 236
$NADP^+$
Glucose-6-phosphate dehydrogenase, Immobilized, NADPH, Continuous production, 974
$NADP^+$ production
$NAD^+$ kinase, Immobilized, Factors affecting, 236
NADPH
$NADP^+$, Glucose-6-phosphate dehydrogenase, Immobilized, Continuous production, 974
NADPH regeneration
Electron transfer, Glutathione reductase, Conjugated redox reaction, Separated reaction system, 1026
Naproxen
Enantioselectivity, Esterification, Lipase, 328
$NH_4^+$
Scleroglucan, Sucrose inhibition, Supplemented batch fermentation, 223
*Nicotiana tabacum*
Hydrodynamic stress, Plant cells, Batch culture, Continuous culture, *Catharanthus roseus, Cinchona robusta, Tabernaemontana divaricata*, 467
Nitrate uptake
Nitrite uptake, Phosphate uptake, Immobilized cells, Polyvinyl foam, Bioreactors, *Phormidium laminosum*, 395
Nitrite uptake
Nitrate uptake, Phosphate uptake, Immobilized cells, Polyvinyl foam, Bioreactors, *Phormidium laminosum*, 395
Nitrogen source
*Botryococcus braunii*, Microalga, Exopolysaccharide, Photoperiod, 546
*n*-octane
Xylene oxygenase, Styrene epoxide, Two-liquid phase, Monooxygenase, 887
Nutrient level
Cellulase, CMCase, Cellobiase, Coconut pith, Solid substrate fermentation, Pretreatment, Particle size, Inoculum size, Time of fermentation, 436

Oligosaccharides (methods used in analysis of)
Glycosylation (biosynthetic pathways control of, enzymes involved in, biological significance of, commercial implications of, role in pharmacokinetics, role in antigenicity, role in solubility), Glycosyltransferases (cell distribution), 354
On-line glucose analyzer
Poly(3-hydroxybutyric-co-3-hydroxyvaleric acid), P(3HB-co-3HV), *Alcaligenes eutrophus*, High cell density culture, Fed-batch culture, Substrate concentration control, 556
Operational stability
Alcoholysis, Interesterification, Lipase, Silica gel, Adsorption, 478
Lipase, Organic solvents, Alcoholysis, Hydrolysis, 2-monoglycerides, Water activity, 1042
*Ophiostoma* spp.
Extracellular proteinase, Staining fungi, Proteolytic activity, Metal-activated serine proteinase, Liquid protein media, Azocoll, 602
Organic media
β-glucosidase, Alkyl glycoside, Water activity, 751
Organic solvent
Alkyl glycoside, Alkyl glycoside fatty acid esters, Enzymatic synthesis, Lipases, Transesterification, 115
Enzymatic synthesis, Citronellyl acetate, *Candida antarctica*, Lipase, 835
Steroid transformation, Progesterone, 11α-hydroxylation, Two-phase system, Alginate-immobilized cells, Polyurea membrane, 485
Organic solvents
Lipase, Alcoholysis, Hydrolysis, 2-monoglycerides, Water activity, Operational stability, 1042
Lipase, EC 3.1.1.3, Immobilized enzyme, Animal fats hydrolysis, *Candida rugosa*, 61
Microaqueous enzymology, Lipase, Esterification, Acyl-transfer, Solvent suitability, Substrate polarity, 577
*Morinda citrifolia*, Log P, Critical solvent concentrations, Membrane, 642
Phenylalanine methyl ester, Yeast, Phenylalanine ammonia lyase, Biphasic system, 318
Sterol, Side-chain degradation, *Mycobacterium* sp., Immobilized cells, 708
Osmolarity
*Saccharomyces cerevisiae*, $^{13}C$-NMR, Osmotic stress, Osmoregulation, Salt stress, Ethanol, Glycerol, 207
Osmoregulation
*Saccharomyces cerevisiae*, Osmolarity, $^{13}C$-NMR, Osmotic stress, Salt stress, Ethanol, Glycerol, 207
Osmotic stress
*Saccharomyces cerevisiae*, Osmolarity, $^{13}C$-NMR, Osmoregulation, Salt stress, Ethanol, Glycerol, 207
Oxidation
Racemic glycidol, Enantioselectivity, *Acetobacter pasteurianus*, 1059
Oxygen concentration
*Spodoptera frugiperda*, Insect cell culture, Perfusion culture, Stirred-tank bioreactor, Serum-free medium, 506
Oxygen electrode
Enzyme immobilization, Biosensors, Bioreactors, Coupling and recycling, $NAD^+$-dependent dehydrogenase, Detection of PCMB, Detection of L-lactate and LDH, 292
Oxygen relations
Yeasts, Xylose fermentation, Ethanol production, 933
Oxygen transfer rate
*Debaryomyces hansenii*, Xylitol, Xylose reductase, Xylitol dehydrogenase, Glucose-6-phosphate dehydrogenase, 6-phosphogluconate dehydrogenase, Alcohol dehydrogenase, 1074
Ozone
Xylanase, Pulp treatment, Biobleaching, Bleaching, Peracetic acid, Performic acid, Caro's acid, 492

P(3HB-co-3HV)
Poly(3-hydroxybutyric-co-3-hydroxyvaleric acid), *Alcaligenes eutrophus*, High cell density culture, Fed-batch culture, On-line glucose analyzer, Substrate concentration control, 556
Packed-bed reactor
Accumulation, Agarose, Algae, Alginate, *Chlorella*, Immobilization, Mercury, Phosphate, Volatilization, 802
Packed-column fermentor
Solid-state fermentation, Heat transfer, Biochemical reaction, Forced aeration, 253
Palm oil midfraction
Interesterfication, Celite-immobilized lipase, Reverse micelles, Gas-lift reactor, 159
Papain
Chitosan, Depolymerization, 110
Parasexual cross
Chymosin, Chlorate resistance, CHEF gel electrophoresis, *Aspergillus niger* var. *awamori*, 376
Particle size
Cellulase, CMCase, Cellobiase, Coconut pith, Solid substrate fermentation, Pretreatment, Nutrient level, Inoculum size, Time of fermentation, 436
Particle size analysis
*Pseudomonas fluorescens* lipase, Hydrolysis, Emulsion system, Lipase adsorption, Interfacial area, Product inhibition, Interfacial properties, Alcoholysis, 513
Partition
Aqueous two-phase systems, α-amylase, pH, PEG molecular weight, Effect of NaCl, Phase volume ratio, *Bacillus subtilis*, Purification factor, Recovery, 131
Passive $H^+$-influx
Extracellular acidification, Proton pumping, Plasma membrane $H^+$-ATPase, Ethanol toxicity, Ethanol tolerance, *Saccharomyces cerevisiae, Kluyveromyces marxianus*, 808
*p*-coumaroyl esterase
Xylan-degrading enzymes, *Aspergillus awamori*, Feruloyl esterase, Phenolic acid esterase, 826
Pectolytic enzymes
*Aspergillus niger*, Submerged cultivation, Bioreactor experiments, Sucrose substrate, Citric acid, 703
PEG molecular weight
Aqueous two-phase systems, Partition, α-amylase, pH, Effect of NaCl, Phase volume ratio, *Bacillus subtilis*, Purification factor, Recovery, 131

Penicillin acylase
*Escherichia coli*, Recombinant, Plasmid, Exponentially fed-batch culture, Penicillin amidase, Computer control, 895
Water-soluble polymers, Activity stabilization, 616
Penicillin amidase
*Escherichia coli*, Recombinant, Plasmid, Exponentially fed-batch culture, Penicillin acylase, Computer control, 895
*Penicillium occitanis*
*Trichoderma reesei*, Cellulase production, Cellulolysis, 538
Pentose sugars
Hemicellulose hydrolyzate, Lignocellulose, D-xylose, Ethanol, Xylitol, Fermentation, Yeast, *Candida shehatae*, *Pichia stipitis*, Kinetic parameters, 944
Pepsin
Collagen, Gelatin, Proctase, Gel strength, 756
Reverse micelles, Dynamic laser scatter, Extraction, Lysozyme, α-chymotrypsin, 970
Peptide synthesis
Protease, Extreme halophile, *Halobacterium halobium*, 266
Peptidylglycine α-amidating enzyme
Amidated peptides, C-terminal amidation, 450
Peracetic acid
Xylanase, Pulp treatment, Biobleaching, Bleaching, Ozone, Performic acid, Caro's acid, 492
Performic acid
Xylanase, Pulp treatment, Biobleaching, Bleaching, Ozone, Peracetic acid, Caro's acid, 492
Perfusion
Hybridomas, Dialysis, Monoclonal antibody, Metabolism, Mathematical model, 688
Perfusion culture
Oxygen concentration, *Spodoptera frugiperda*, Insect cell culture, Stirred-tank bioreactor, Serum-free medium, 506
Permeabilization
*Kluyveromyces lactis*, β-galactosidase, 340
*Kluyveromyces lactis*, Immobilization, Milk whey, β-galactosidase, 303
Peroxidases
Lignin, Lignin peroxidase, Horseradish peroxidase, 125
pH
Aqueous two-phase systems, Partition, α-amylase, PEG molecular weight, Effect of NaCl, Phase volume ratio, *Bacillus subtilis*, Purification factor, Recovery, 131
*Phanerochaete chrysosporium*
Cellobiose dehydrogenase (formerly cellobiose oxidase), Cellobiose, Quinone oxoreductase, Lignin peroxidase, Manganese peroxidase, [$^{14}$C]DHP mineralization, Lignin degradation, 771
Phase volume ratio
Aqueous two-phase systems, Partition, α-amylase, pH, PEG molecular weight, Effect of NaCl, *Bacillus subtilis*, Purification factor, Recovery, 131
Phenol
*Coprinus macrorhizus*, Fungal peroxidase, Aromatics, Enzymatic removal, Precipitation, Polymerization, Hydrogen peroxide depletion, 120
Phenol oxidase
Enzyme immobilization, Copper alginate, 151
Phenylalanine ammonia lyase
Phenylalanine methyl ester, Yeast, Organic solvents, Biphasic system, 318
Phenylalanine methyl ester
Yeast, Phenylalanine ammonia lyase, Organic solvents, Biphasic system, 318
Pheonolic acid esterase
Xylan-degrading enzymes, *Aspergillus awamori*, Feruloyl esterase, *p*-coumaroyl esterase, 826
*Phormidium laminosum*
Nitrate uptake, Nitrite uptake, Phosphate uptake, Immobilized cells, Polyvinyl foam, Bioreactors, 395
Phosphate
Accumulation, Agarose, Algae, Alginate, *Chlorella*, Immobilization, Mercury, Packed-bed reactor, Volatilization, 802
Phosphate damage
11α-hydroxylation, Progesterone, Alginate-immobilized cells, Gelling agent, Alginate gel stability, 551
Phosphate uptake
Nitrate uptake, Nitrite uptake, Immobilized cells, Polyvinyl foam, Bioreactors, *Phormidium laminosum*, 395
6-Phosphogluconate dehydrogenase Debaryomyces hansenii, Xylitol, Xylose reductase, Xylitol dehydrogenase, Glucose-6-Phosphate dehydrogenase, Alcohol dehydrogenase, Oxygen transfer rate, 1074
Phosphorylated PVA gel
Polyvinyl alcohol (PVA), Esterification, Denitrification, Immobilization, 79
Photoperiod
*Botryococcus braunii*, Microalga, Exopolysaccharide, Nitrogen source, 546
pH profile prediction
Microbial growth, Glucose fermentation, Mixed acid production, Dynamical modeling, 163
Physiological factors
Heterologous expression, *Aspergillus niger*, Lysozyme, Glucoamylase, 276
Physiology
Immobilized cells, Yeast, Beer, Beverage industry, Fermentation technology, 365
*Pichia farinosa*
Whey permeate, Glycerol, *Kluyveromyces marxianus*, Sulfite, 143
*Pichia pastoris*
Alcohol oxidase, Catalase, Hydrogen peroxide, Production, Treated cells, 10
*Pichia stipitis*
D-xylose, Inhibition, Kinetics, Immobilization, Microcalorimetry, 622
Hemicellulose hydrolyzate, Lignocellulose, D-xylose, Pentose sugars, Ethanol, Xylitol, Fermentation, Yeast, *Candida shehatae*, Kinetic parameters, 944
Xylose, Cell immobilization, Pulsing bioreactor, 72
Pigments
Ethanol, *Monascus purpureus*, 996
*Monascus purpureus*, Monascorubramine, Crabtree effect, Respirofermentation, 584
Plant cells
Hydrodynamic stress, Batch culture, Continuous culture, *Catharanthus roseus*, *Nicotiana tabacum*, *Cinchona robusta*, *Tabernaemontana divaricata*, 467
Plant pathogens
β-N-Acetylhexosaminidases, *Gliocladium virens*, Enzymes, Biological control, 849
Plasma membrane $H^+$-ATPase
Extracellular acidification, Proton pumping, Passive $H^+$-influx, Ethanol toxicity, Ethanol tolerance, *Saccharomyces cerevisiae*, *Kluyveromyces marxianus*, 808
Plasmid
*Escherichia coli*, Recombinant, Exponentially fed-batch culture, Penicillin acylase, Penicillin amidase, Computer control, 895
Plasmid stability
*Bacillus subtilis*, Alkaline protease, 534
*Bacillus subtilis*, *Escherichia coli*, Fermentation, 240
*Pleurotus florida*
Exopolysaccharide, β1-3-D-Glucan, Stirred-tank reactor, Airlift reactor, 566
Poly(3-hydroxybutyric-co-3-hydroxyvaleric acid)
P(3HB-co-3HV), *Alcaligenes eutrophus*, High cell density culture, Fed-batch culture, On-line glucose analyzer, Substrate concentration control, 556
Poly(dimethyldiallylammonium chloride)
Immobilization, Encapsulation, Polyelectrolyte complex microcapsules, Cellulose sulfate, Citrate-production microorganisms, *Yarrowia lipolytica*, Fluidized bed fermentation, 777
Polyelectrolyte complex microcapsules
Immobilization, Encapsulation, Poly(dimethyldiallylammonium chloride), Cellulose sulfate, Citrate-production microorganisms, *Yarrowia lipolytica*, Fluidized bed fermentation, 777
Polymerization
*Coprinus macrorhizus*, Fungal peroxidase, Aromatics, Phenol, Enzymatic removal, Precipitation, Hydrogen peroxide depletion, 120
Polymerization in low-water systems
Chymotrypsin, Subtilisin, Low-water systems, 522
Polyphenol oxidase
Reverse micelles, Reverse vesicles, Enzymatic activity, 409
Polysaccharides
β-glucosidase, Compartmental electrophoresis, *Aspergillus niger*, 912
Polyurea membrane
Steroid transformation, Progesterone, 11α-hydroxylation, Organic solvent, Two-phase system, Alginate-immobilized cells, 485
Polyvinyl alcohol (PVA)
Phosphorylated PVA gel, Esterification, Denitrification, Immobilization, 79
Polyvinyl foam
Nitrate uptake, Nitrite uptake, Phosphate uptake, Immobilized cells, Bioreactors, *Phormidium laminosum*, 395
Precipitation
*Coprinus macrorhizus*, Fungal peroxidase, Aromatics, Phenol, Enzymatic removal, Polymerization, Hydrogen peroxide depletion, 120
D-Xylulose, Enzymatic isomerization, Ion-exchange chromatography, 388
Salting-out, Solubility, Hydrophobic peptides, Bioactive peptides, Casein, 591
Pretreatment
Cellulase, CMCase, Cellobiase, Coconut

pith, Solid substrate fermentation, Nutrient level, Particle size, Inoculum size, Time of fermentation, 436
Process integration
Membrane reactor, Ultrafiltration, Enzymatic reactors, Bioreactors, 738
Ultrafiltration membrane bioreactor, Reveresed membranes, Dipeptide synthesis, α-chymotrypsin, 1064
Proctase
Collagen, Gelatin, Pepsin, Gel strength, 756
Product inhibition
*Pseudomonas fluorescens* lipase, Hydrolysis, Emulsion system, Lipase adsorption, Particle size analysis, Interfacial area, Interfacial properties, Alcoholysis, 513
Production
*Pichia pastoris*, Alcohol oxidase, Catalase, Hydrogen peroxide, Treated cells, 10
Progesterone
11α-hydroxylation, Alginate-immobilized cells, Gelling agent, Alignate gel stability, Phosphate damage, 551
Steroid transformation, 11α-hydroxylation, Organic solvent, Two-phase system, Alginate-immobilized cells, Polyurea membrane, 485
*Propionibacterium*
Propionic acid, Glycerol, Membrane bioreactor, 883
Propionic acid
*Propionibacterium*, Glycerol, Membrane bioreactor, 883
Protease
Extreme halophile, *Halobacterium halobium*, Peptide synthesis, 266
Fuel alcohol, Very high gravity fermentation, VHG, Wheat, 683
Protein secretion
Ammonium, Endocrine cells, 90
Proteolytic activity
Extracellular proteinase, Staining fungi, *Ophiostoma* spp., Metal-activated serine proteinase, Liquid protein media, Azocoll, 602
Proton pumping
Extracellular acidification, Plasma membrane $H^+$-ATPase, Passive $H^+$-influx, Ethanol toxicity, Ethanol tolerance, *Saccharomyces cerevisiae, Kluyveromyces marxianus*, 808
Protoplast fusion
*T. reesei, S. cerevisiae*, Cellulose, Bioconversion, Ethanol, 870
*Pseudomonas amyloderamosa*
Isoamylase, Raw starch adsorption, 247
*Pseudomonas fluorescens*
Cyanide biodegradation, Zeolite, 529
*Pseudomonas fluorescens* lipase
Hydrolysis, Emulsion system, Lipase adsorption, Particle size analysis, Interfacial area, Product inhibition, Interfacial properties, Alcoholysis, 513
*Pseudomonas oleovorans*
Alkane hydroxylase, Substrate specificity, Branched alkanes, Alkylbenzenes, Aliphatic, Alicylic, 904
*Pseudomonas putida*
Biosensors, Salicylate, Salicylate hydroxylase, 665
*Pseudomonas pyrrocinia*
Haloperoxidase, Chloroperoxidase, Bromoperoxidase, Pyrrolnitrin, 7-chlorotetracycline, *Streptomyces aureofaciens*, 53
*Pseudomonas stutzeri*
Bioconversion, Maltotetraose, Maltotetraohydrolase, Pullulanase, Mass balance, Membrane recycle bioreactor, 0Y
Pullulan
Alginate, Biproduction, Dextran, Exopolysaccharides, Immobilized cells, Xanthan, 0E
Pullulanase
Bioconversion, Maltotetraose, Maltotetraohydrolase, Mass balance, Membrane recycle bioreactor, *Pseudomonas stutzeri*, 0Y
Pulping
Xylanase production, Fibers, Ramie, Flax, Biomass, Cellulosic fibers, Lignocellulosics, Delignification, Bioconversion, Bleaching, Fungi, 627
Pulp treatment
Xylanase, Biobleaching, Bleaching, Ozone, Peracetic acid, Performic acid, Caro's acid, 492
Pulsing bioreactor
Xylose, *Pichia stipitis*, Cell immobilization, 72
Purification
Glucoamylase, *Hormoconis resinae, Trichoderma reesei*, Recombinant, 36
Thermostable, α-amylase, Characterization, 985
Purification factor
Aqueous two-phase systems, Partition, α-amylase, pH, PEG molecular weight, Effect of NaCl, *Bacillus subtilis*, Purification factor, Recovery, 131
Pyrrolnitrin
Haloperoxidase, Chloroperoxidase, Bromoperoxidase, 7-chlorotetracycline, *Pseudomonas pyrrocinia, Streptomyces aureofaciens*, 53

Quinone oxidoreductase
Cellobiose dehydrogenase (formerly cellobiose oxidase), Cellobiose, Lignin peroxidase, Manganese peroxidase, *Phanerochaete chrysosporium*, [$^{14}$C]DHP mineralization, Lignin degradation, 771

Racemic glycidol
Oxidation, Enantioselectivity, *Acetobacter pasteurianus*, 1059
Ramie
Xylanase production, Fibers, Flax, Biomass, Cellulosic fibers, Lignocellulosics, Delignification, Bioconversion, Pulping, Bleaching, Fungi, 627
Raw starch adsorption
*Pseudomonas amyloderamosa*, Isoamylase, 247
Recombinant
*Escherichia coli*, Plasmid, Exponentially fed-batch culture, Penicillin acylase, Penicillin amidase, Computer control, 895
Glucoamylase, *Hormoconis resinae, Trichoderma reesei*, Purification, 36
Recovery
Aqueous two-phase systems, Partition, α-amylase, pH, PEG molecular weight, Effect of NaCl, *Bacillus subtilis*, Purification factor, 131
Respirofermentation
*Monascus purpureus*, Pigments, Monascorubramine, Crabtree effect, 584
Reversed micelles
Ultrafiltration membrane bioreactor, Dipeptide synthesis, Process integration, α-chymotrypsin, 1064
Reverse micelles
Dynamic laser scatter, Extraction, Lysozyme, α-chymotrypsin, Pepsin, 970
Interesterfication, Palm oil midfraction, Celite-immobilized lipase, Gas-lift reactor, 159
Reverse vesicles, Enzymatic activity, Polyphenol oxidase, 409
Reverse vesicles
Reverse micelles, Enzymatic activity, Polyphenol oxidase, 409
*Rhizopus arrhizus*
Metal ions, Adsorption, Isotherms, Hard and soft metals, 671
Ribonuclease $T_2$
Flavin adenine dinucleotide-3', Apoglucose oxidase, Amplification assay, 281
*Ruminococcus*
Exoglucanase, Monoclonal antibody, Inhibition, 2

*Saccharomyces cerevisiae*
Extracellular acidification, Proton pumping, Plasma membrane $H^+$-ATPase, Passive $H^+$-influx, Ethanol toxicity, Ethanol tolerance, *Kluyveromyces marxianus*, 808
Metabolic control, Sugar uptake, Glycolysis, Chemostat cultures, 761
Osmolarity, $^{13}$C-NMR, Osmotic stress, Osmoregulation, Salt stress, Ethanol, Glycerol, 207
Salicylate
Biosensors, Salicylate hydroxylase, *Pseudomonas putida*, 665
Salicylate hydroxylase
Biosensors, Salicylate, *Pseudomonas putida*, 665
Salting-out
Precipitation, Solubility, Hydrophobic peptides, Bioactive peptides, Casein, 591
Salt stress
*Saccharomyces cerevisiae*, Osmolarity, $^{13}$C-NMR, Osmotic stress, Osmoregulation, Ethanol, Glycerol, 207
*S. cerevisiae*
*T. reesei*, Protoplast fusion, Cellulose, Bioconversion, Ethanol, 870
*Schizophyllum commune*
Xylanase, Cellulase, Mannanse, 229
Scleroglucan
$NH_4^+$, Sucrose inhibition, Supplemented batch fermentation, 223
Secondary metabolism
Immobilized plant cells, *Vitis vinifera*, Anthocyanins, Cell growth, 416
Separated reaction system
Electron transfer, NADPH regeneration, Glutathione reductase, Conjugated redox reaction, 1026
Serum-free medium
Oxygen concentration, *Spodoptera frugiperda*, Insect cell culture, Perfusion culture, Stirred-tank bioreactor, 506
Serum requirement
Animal cell culture, Isolation method, 726
Side-chain degradation
Sterol, *Mycobacterium* sp., Immobilized cells, Organic solvents, 708

Silanization
Glycosidase, β-glucosidase, α-arabinosidase, α-rhamnosidase, Immobilization, Aroma enhancement, 286
Silica gel
Alcoholysis, Interesterification, Lipase, Operational stability, Adsorption, 478
Slurry fermentation
Solid substrate fermentation, Submerged fermentation, Cyclodextrin glycosyl transferase, Wheat bran extract, *Bacillus cereus*, 441
Solid-state fermentation
Heat transfer, Packed-column fermentor, Biochemical reaction, Forced aeration, 253
Water balance, *Metarhizium anisopliae*, 562
Solid substrate fermentation
Cellulase, CMCase, Celiobiase, Coconut pith, Pretreatment, Nutrient level, Particle size, Inoculum size, Time of fermentation, 436
Submerged fermentation, Slurry fermentation, Cyclodextrin glycosyl transferase, Wheat bran extract, *Bacillus cereus*, 441
Solubility
Glucoamylase, Disaccharides, Trisaccharides, 2-methoxyethyl ether, 2-ethoxyethyl ether, Triethylene glycol dimethyl ether, Kinetics, Stability, 383
Precipitation, Salting-out, Hydrophobic peptides, Bioactive peptides, Casein, 591
Solvent
Lipase, Hydrolysis, Fatty acid, 432
Solvent suitability
Microaqueous enzymology, Lipase, Esterification, Acyl-transfer, Organic solvents, Substrate polarity, 577
*Spodoptera frugiperda*
Oxygen concentration, Insect cell culture, Perfusion culture, Stirred-tank bioreactor, Serum-free medium, 506
Spore inoculum
Biocontrol agent, Biomass production, *Idriella (Microdochium) bolleyi*, 24
Stability
Glucoamylase, Disaccharides, Trisaccharides, 2-methoxyethyl ether, 2-ethoxyethyl ether, Triethylene glycol dimethyl ether, Kinetics, Solubility, 383
Lipase, Monoacylglycerols, Triolein, Dioleylglycerol, Monooleylglycerol, Glycerolysis, Activity, Immobilization, 864
Staining fungi
Extracellular proteinase, *Ophiostoma* spp., Proteolytic activity, Metal-activated serine proteinase, Liquid protein media, Azocoll, 602
Starch-binding domain
Granular starch, β-galactosidase, Fusion protein, Adsorption, Elution, 18
Steroid transformation
Progesterone, 11α-hydroxylation, Organic solvent, Two-phase system, Alginate-immobilized cells, Polyurea membrane, 485
Sterol
Side-chain degradation, *Mycobacterium* sp., Immobilized cells, Organic solvents, 708
*S. thermophilus*
β-galactosidase, Detergent effects, Cell permeabilization, 573
Stirred-tank
Esters, Beer, Fermentation, Kinetics, Industrial, 66
Stirred-tank bioreactor
Oxygen concentration, *Spodoptera frugiperda*, Insect cell culture, Perfusion culture, Serum-free medium, 506
Stirred-tank reactor
Exopolysaccharide, β1-3-D-Glucan, *Pleurotus florida*, Airlift reactor, 566
Strain selection
Xylose, Taxonomy, Genetics, Yeast, Fermentation, 922
Streptavidin
Biotin, Cellulose-binding domain, Fusion protein, β-glucosidase, Alkaline phosphatase, Enzyme immobilization, 496
*Streptomyces*
Glucose/xylose isomerase, Unfolding and refolding, 323
*Streptomyces aureofaciens*
Haloperoxidase, Chloroperoxidase, Bromoperoxidase, Pyrrolnitrin, 7-chlorotetracycline, *Pseudomonas pyrrocinia*, 53
*Streptomyces lividans*
Xylanase, Mutagenesis, Thermostable enzyme, 420
Styrene epoxide
TOL plasmid, Xylene oxygenase, Benzyl alcohols, 608
Xylene oxygenase, Two-liquid phase, *n*-octane, Monooxygenase, 887
Submerged cultivation
Pectolytic enzymes, *Aspergillus niger*, Bioreactor experiments, Sucrose substrate, Citric acid, 703
Submerged fermentation
Solid substrate fermentation, Slurry fermentation, Cyclodextrin glycosyl transferase, Wheat bran extract, *Bacillus cereus*, 441
Substrate concentration control
Poly(3-hydroxybutyric-co-3-hydroxyvaleric acid), P(3HB-co-3HV), *Alcaligenes eutrophus*, High cell density culture, Fed-batch culture, On-line glucose analyzer, 556
Substrate polarity
Microaqueous enzymology, Lipase, Esterification, Acyl-transfer, Organic solvents, Solvent suitability, 577
Substrate specificity
*Pseudomonas oleovorans*, Alkane hydroxylase, Branched alkanes, Alkylbenzenes, Aliphatic, Alicyclic, 904
Subtilisin
Chymotrypsin, Low-water systems, Polymerization in low-water systems, 522
Sucrose inhibition
Scleroglucan, $NH_4^+$, Supplemented batch fermentation, 223
Sucrose substrate
Pectolytic enzymes, *Aspergillus niger*, Submerged cultivation, Bioreactor experiments, Citric acid, 703
Sugarcane
Zeolite, Ethanol, Fermentation, Molasses, 719
Sugar uptake
Metabolic control, Glycolysis, *Saccharomyces cerevisiae*, Chemostat cultures, 761
Sulfite
Whey permeate, Glycerol, *Kluyveromyces marxianus, Pichia farinosa*, 143
Supercritical carbon dioxide
Glycidol, Enantioselective esterification, Lipase, 785
Supplemented batch fermentation
Scleroglucan, $NH_4^+$, Sucrose inhibition, 223
Synergism
Actinomycete xylanases, Xylan solubility, 696
Cellulose, Cellulase, Adsorption, Thermodynamics, 649

*Tabernaemontana divaricata*
Hydrodynamic stress, Plant cells, Batch culture, Continuous culture, *Catharanthus roseus, Nicotiana tabacum, Cinchona robusta*, 467
Taxonomy
Xylose, Strain selection, Genetics, Yeast, Fermentation, 922
Thermodynamics
Cellulose, Cellulase, Adsorption, Synergism, 649
Thermophilic fungus
Cellulase-free xylanase, Jute fiber upgrading, 298
Thermostability
Horseradish peroxidase, Enzyme stabilization, Chemical modification, 501
Thermostable
α-amyulase, Purification, Characterization, 985
Thermostable enzyme
Xylanase, Mutagenesis, *Streptomyces lividans*, 420
Time of fermentation
Cellulase, CMCase, Cellobiase, Coconut pith, Solid substrate fermentation, Pretreatment, Nutrient level, Particle size, Inoculum size, 436
TOL plasmid
Xylene oxygenase, Benzyl alcohols, Styrene epoxide, 608
Transesterification
Alkyl glycoside, Alkyl glycoside fatty acid esters, Enzymatic synthesis, Lipases, Organic solvent, 115
Treated cells
*Pichia pastoris*, Alcohol oxidase, Catalase, Hydrogen peroxide, Production, 10
*T. reesei*
*S. cerevisiae*, Protoplast fusion, Cellulose, Bioconversion, Ethanol, 870
*Trichoderma reesei*
α-glucuronidase, Xylanase, β-xylosidase, Xylan hydrolysis, 813
Cellooligosaccharides, Cellobiohydrolase, Enzymatic hydrolysis, Exocellulase, Kinetic modeling, 43
Continuous culture, Lactose, Growth and maintenance parameters, Cellulase biosynthesis, Comparison with other mutants of *T. reesei* and soluble substrates, 1079
Glucoamylase, *Hormoconis resinae*, Purification, Recombinant, 36
*Penicillium occitanis*, Cellulase production, Cellulolysis, 538
Triethylene glycol dimethyl ether
Glucoamylase, Disaccharides, Trisaccharides, 2-methoxyethyl ether, 2-ethoxyethyl ether, Kinetics, Stability, Solubility, 383
Triolein
Lipase, Monoacylglycerols, Dioleylglycerol, Monooleylglycerol, Glycerolysis, Activity, Stability, Immobilization, 864

Trisaccharides
Glucoamylase, Disaccharides, 2-methoxyethyl ether, 2-ethoxyethyl ether, Triethylene glycol dimethyl ether, Kinetics, Stability, Solubility, 383
Two-liquid phase
Xylene oxygenase, Styrene epoxide, *n*-octane, Monooxygenase, 887
Two-phase anaerobic digester
Copper, Lead, 991
Two-phase system
Steroid transformation, Progesterone, 11α-hydroxylation, Organic solvent, Alginate-immobilized cells, Polyurea membrane, 485
Tyrosine
Lysozyme, Electrosynthesis, 795

Ultrafiltration
Membrane reactor, Enzymatic reactors, Process integration, Bioreactors, 738
Ultrafiltration membrane bioreactor
Reversed micelles, Dipeptide synthesis, Process integration, α-chymotrypsin, 1064
Unfolding and refolding
Glucose/xylose isomerase, *Streptomyces*, 323

Very high gravity fermentation
Fuel alcohol, VHG, Protease, Wheat, 683
VHG
Fuel alcohol, Very high gravity fermentation, Protease, Wheat, 683
*Vitis vinifera*
Immobilized plant cells, Anthocyanins, Cell growth, Secondary metabolism, 416
Volatilization
Accumulation, Agarose, Algae, Alginate, *Chlorella*, Immobilization, Mercury, Packed-bed reactor, Phosphate, 802

Water activity
β-glucosidase, Alkyl glycoside, Organic media, 751
Lipase, Organic solvents, Alcoholysis, Hydrolysis, 2-monoglycerides, Operational stability, 1042
Water balance
Solid state fermentation, *Metarhizium anisopliae*, 562
Water-soluble polymers
Activity stabilization, Penicillin acylase, 616
Wheat
Fuel alcohol, Very high gravity fermentation, VHG, Protease, 683
Wheat bran extract
Solid substrate fermentation, Submerged fermentation, Slurry fermentation, Cyclodextrin glycosyl transferase, *Bacillus cereus*, 441
Wheat mash
Lactic acid, Backset, Bacterial contaminants, 311
Whey permeate
Glycerol, *Kluyveromyces marxianus, Pichia farinosa*, Sulfite, 143
*Lactobacillus helveticus*, Continuous fermentation, Immobilized cells, Lactic acid, 457
Wood
Biopolymer, Ligninase, Lignin peroxidase, Lignocellulose, Lignin, Cellulose, 676

Xanthan
Alginate, Bioproduction, Dextran, Exopolysaccharides, Immobilized cells, Pullulan, 1048
Xylan-degrading enzymes
*Aspergillus awamori*, Feruloyl esterase, *p*-coumaroyl esterase, Phenolic acid esterase, 826
Xylanase
α-glucuronidase, β-xylosidase, *Trichoderma reesei*, Xylan hydrolysis, 813
Cellulase, Mannanse, *Schizophyllum commune*, 229
Mutagenesis, Thermostable enzyme, *Streptomyces lividans*, 420
Pulp treatment, Biobleaching, Bleaching, Ozone, Peracetic acid, Performic acid, Caro's acid, 492
Xylanase production
Fibers, Ramie, Flax, Biomass, Cellulosic fibers, Lignocellulosics, Delignification, Bioconversion, Pulping, Bleaching, Fungi, 627
Xylan-degrading enzymes
*Aspergillus awamori*, Furuloyl esterase, *p*-coumaroyl esterase, Phenolic acid esterase, 826
Xylan hydrolysis
α-glucuronidase, Xylanase, β-xylosidase, *Trichoderma reesei*, 813
Xylan solubility
Actinomycete xylanases, Synergism, 696
Xylene oxygenase
Styrene epoxide, Two-liquid phase, *n*-octane, Monooxygenase, 887
TOL plasmid, Benzyl alcohols, Styrene epoxide, 608
Xylitol
*Debaryomyces hansenii*, Xylose reductase, Xylitol dehydrogenase, Glucose-6-phosphate dehydrogenase, 6-phosphogluconate dehydrogenase, Alcohol dehydrogenase, Oxygen transfer rate, 1074
Hemicellulose hydrolyzate, Lignocellulose, D-xylose, Pentose sugars, Ethanol, Fermentation, Yeast, *Candida shehatae, Pichia stipitis*, Kinetic parameters, 944
Xylitol dehydrogenase
*Debaryomyces hansenii*, Xylitol, Xylose reductase, Glucose-6-phosphate dehydrogenase, 6-phosphogluconate dehydrogenase, Alcohol dehydrogenase, Oxygen transfer rate, 1074
Xylose
Enzyme ratio, Coimmobilization, Xylulose, Flow system, 216
*Pichia stipitis*, Cell immobilization, Pulsing bioreactor, 72
Strain selection, Taxonomy, Genetics, Yeast, Fermentation, 922
Xylose fermentation
Yeasts, Ethanol production, Oxygen relations, 933
Xylose reductase
*Debaryomyces hansenii*, Xylitol, Xylitol dehydrogenase, Glucose-6-phosphate dehydrogenase, 6-phosphogluconate dehydrogenase, Alcohol dehydrogenase, Oxygen transfer rate, 1074
Xylulose
Enzyme ratio, Coimmobilization, Xylose, Flow system, 216

*Yarrowia lipolytica*
Immobilization, Encapsulation, Polyelectrolyte complex microcapsules, Poly(dimethyldiallylammonium chloride), Cellulose sulfate, Citrate-producing microorganisms, Fluidized bed fermentation, 777
Encapsulation, Coimmobilization, Invertase, Citric acid production, Polyelectrolyte complex microcapsules, 0R
Yeast
Hemicellulose hydrolyzate, Lignocellulose, D-xylose, Pentose sugars, Ethanol, Xylitol, Fermentation, *Candida shehatae, Pichia stipitis*, Kinetic parameters, 944
Immobilized cells, Beer, Beverage industry, Fermentation technology, Physiology, 365
Metals, Cell walls, Binding, 633
Phenylalanine methyl ester, Phenylalanine ammonia lyase, Organic solvents, Biphasic system, 318
Xylose, Strain selection, Taxonomy, Genetics, Fermentation, 922
Yeasts
Xylose fermentation, Ethanol production, Oxygen relations, 933

Zeolite
Cyanide biodegradation, *Pseudomonas fluorescens*, 529
Ethanol, Fermentation, Sugarcane, Molasses, 719
